OMB Control Number: 1845–0132.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: Individuals or Households.

Abstract: This is a request to for an extension of the emergency clearance that was granted on this collection on June 5, 2015 to facilitate the continued collection of information from borrowers who believe they have cause to invoke the borrower defenses against repayment of a student loan as noted in regulation. The regulations for borrower defenses are specified in 34 CFR 685.206(c). The regulation states, in part, “(c)(1) [i]n any proceeding to collect on a Direct Loan, the borrower may assert as a defense against repayment, an act or omission of the school attended by the student that would give rise to a cause of action against the school under applicable State law.” Prior to 2015, the borrower defense identified above was rarely asserted by any borrowers and no specific methods of collecting information was defined or found necessary.

These processes are being offered to aid in preserving borrowers rights and to meet the fiduciary responsibilities of the federal student loan programs. These collections will allow the Department of Education to inform borrowers and loan servicers of the information needed to review and adjudicate requests for relief under borrower defenses regulations.

Title of Collection: Middle Grades Longitudinal Study of 2017–2018 (MGLS:2017) Recruitment for 2017 Operational Field Test.

OMB Control Number: 1850–0911.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Individuals.

Total Estimated Number of Annual Responses: 1,224.

Total Estimated Number of Annual Burden Hours: 438.

Abstract: The Middle Grades Longitudinal Study of 2017–2018 (MGLS:2017) is the first study sponsored by the National Center for Education Statistics (NCES), within the Institute of Education Sciences (IES) of the U.S. Department of Education (ED), to follow a nationally-representative sample of students as they enter and move through the middle grades (grades 6–8). The data collected through repeated measures of key constructs will provide a rich descriptive picture of the academic experiences and development of students during these critical years and will allow researchers to examine associations between contextual factors and student outcomes. The study will focus on student achievement in mathematics and literacy along with measures of student socioemotional wellbeing and other outcomes. The study will also include a special sample of students with different types of disabilities that will provide descriptive information on their outcomes, educational experiences, and special education services. Baseline data for the MGLS:2017 will be collected from a nationally-representative sample of 6th grade students beginning in January 2018, with annual follow-ups beginning in January 2019 and in January 2020 when most of the students in the sample will be in grades 7 and 8, respectively. This request is to contact and recruit public school districts and public and private schools, beginning in January 2016, to participate in the MGLS:2017 Operational Field Test (OFT) which will take place from January to June 2017. The primary purpose of the OFT is to obtain information on recruiting, particularly for the targeted disability groups; obtaining a tracking sample that can be used to study mobility patterns in subsequent years; and testing protocols and administrative procedures. The OFT will inform the materials and procedures for the main study base year and follow-up data

collections. The base year data collection will begin in January 2018.
