NATIONAL TRANSPORTATION SAFETY BOARD

Sunshine Act Meeting

TIME AND DATE: 9:30 a.m., Tuesday, September 27, 2011.

PLACE: NTSB Conference Center, 429 L'Enfant Plaza, SW., Washington, DC 20594.

STATUS: The ONE item is open to the public.

MATTER TO BE CONSIDERED: 8205A *Marine Accident Report*—Collision of Tankship *EAGLE OTOME* with Cargo Vessel *GULL ARROW* and Subsequent Collision with the *DIXIE VENGEANCE* Tow Sabine-Neches Canal, Port Arthur, Texas, January 23, 2010.

NEWS MEDIA CONTACT: Telephone: (202) 314-6100.

The press and public may enter the NTSB Conference Center one hour prior to the meeting for set up and seating.

Individuals requesting specific accommodations should contact Rochelle Hall at (202) 314-6305 by Friday, September 23, 2011.

The public may view the meeting via a live or archived Webcast by accessing a link under "News & Events" on the NTSB home page at <http://www.nts.gov>.

FOR FURTHER INFORMATION CONTACT: Candi Bing, (202) 314-6403 or by e-mail at bingc@nts.gov.

September 9, 2011.

Candi R. Bing,

Federal Register Liaison Officer.

BILLING CODE 7533-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-341; NRC-2011-0215]

Detroit Edison Company, Fermi 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an amendment to Facility Operating License No. NPF-43, issued to Detroit Edison Company (the licensee), for operation of the Fermi 2, located in Monroe County, Michigan, in accordance with Title 10 of the Code of Federal Regulations (10 CFR) 50.90. Therefore, as required by 10 CFR 51.21, the NRC performed an environmental assessment. Based on the results of the environmental assessment, the NRC is issuing a finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would revise the Radiological Emergency Response Preparedness Plan (RERP) to increase the staff augmentation times for the Operational and Technical Support Centers-related functions from 30 to 60 minutes, and for Emergency Operations Facility (EOF)-related functions from 60 to 90 minutes.

The proposed action is in accordance with the licensee's application dated September 24, 2010 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML102700478), as supplemented by letter dated March 4, 2011 (ADAMS Accession No. ML110660050).

The Need for the Proposed Action

The proposed change increases the emergency plan (EP) staff augmentation times from 30 and 60 minutes to 60 and 90 minutes. Specifically, the proposed change requests a revision to the Fermi 2 Emergency Plan Table B-1, "Fermi 2 Emergency Response Organization [ERO]," to increase the staff augmentation times for Technical Support Center-related functions from 30 to 60 minutes, and for EOF-related functions from 60 to 90 minutes.

The proposed change is needed to address concerns for the safety of ERO personnel when responding to the site due to the increase in population and redistribution within the 10-mile Emergency Planning Zone (EPZ). When considering that two lane roads comprise the majority of highways within the EPZ, this has created increased traffic congestion and increased traffic control delays.

Consequently, personnel that respond to the site have encountered more delays than when the plant was first licensed. Additional delays may occur in the future based on continued population growth.

Improvements have been made to equipment, procedures, and training since initial approval of the Fermi 2 EP that have resulted in a significant increase in the on-shift capabilities and knowledge such there would be no degradation or loss of EP function as a result of the proposed change. A functional analysis was also performed on the effect of the proposed change on the timeliness of performing major tasks for the major functional areas of RERP plan. The analysis concluded that extension of staff augmentation times would not significantly affect the ability to perform the required tasks.

Environmental Impacts of the Proposed Action

The NRC has completed its environmental assessment of the proposed exemption. The staff has concluded that the proposed action to increase the staff augmentation times for the Operational and Technical Support Centers-related functions from 30 to 60 minutes, and for EOF-related functions from 60 to 90 minutes would not significantly affect plant safety and would not have a significant adverse effect on the probability of an accident occurring.

The proposed action would not result in an increased radiological hazard beyond those previously analyzed in the updated Safety Analysis Report. There will be no change to radioactive effluents that effect radiation exposures to plant workers and members of the public. No changes will be made to plant buildings or the site property. Therefore, no changes or different types of radiological impacts are expected as a result of the proposed exemption.

The proposed action does not result in changes to land use or water use, or result in changes to the quality or quantity of non-radiological effluents. No changes to the National Pollution Discharge Elimination System permit are needed. No effects on the aquatic or terrestrial habitat in the vicinity or the plant, or to threatened, endangered, or protected species under the Endangered Species Act, or impacts to essential fish habitat covered by the Magnuson-Stevens Act are expected. There are no impacts to the air or ambient air quality. There are no impacts to historical and cultural resources. There would be no noticeable effect on socioeconomic conditions in the region. Therefore, no changes or different types of non-
