

of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Incinerators.

Estimated Number of Respondents: 82.

Frequency of Response: Initially and occasionally.

Estimated Total Annual Hour Burden: 8,393.

Estimated Total Annual Cost: \$998,858, which includes \$793,858 in labor costs, no capital/startup costs, and \$205,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There are no changes to the labor hours for the Respondents in this ICR as compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the respondents is very low, negative or non-existent.

However, there is an increase in respondent labor costs due to labor rate increases from the year 2003 to the most recent available labor rate data.

Dated: May 7, 2010.

John Moses,

Director, Collection Strategies Division.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9146-6]

Clean Water Act Section 303(d): Availability of Los Angeles Area Lakes Total Maximum Daily Loads (TMDLs)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This action announces the availability of EPA proposed total maximum daily loads (TMDLs) for Echo Park Lake, Lincoln Park Lake, Peck Road Park Lake, Lake Calabasas, Lake Sherwood, Puddingstone Reservoir, Legg Lakes, Santa Fe Dam Park and El Dorado Park Lakes to address nutrient, mercury, chlordane, dieldrin, DDT,

PCB, and trash impairments pursuant to Clean Water Act Section 303(d)(1), and requests public comment. Section 303(d)(1) requires that states submit water quality planning documents called total maximum daily loads for impaired waters for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards. EPA must approve or disapprove the State's submitted TMDLs.

EPA is providing the public the opportunity to review the proposed TMDLs. EPA is establishing these TMDLs in lieu of California because of deadlines associated with the consent decree described under **SUPPLEMENTARY INFORMATION**. EPA will prepare a responsiveness summary that demonstrates how public comments were considered in the final TMDL decisions. The responsiveness document will be available along with the final TMDLs at EPA's Region IX Web site below.

DATES: Comments must be submitted to EPA on or before June 28, 2010.

ADDRESSES: Comments on the proposed decisions should be sent to Valentina Cabrera Stagno, Water Division (WTR-2), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105, telephone (415) 972-3434, facsimile (415) 947-3537, e-mail cabrera-stagno.valentina@epa.gov. Oral comments will not be considered. Copies of the proposed TMDLs will be available on EPA Region IX's Web site at <http://www.epa.gov/region9/water/tmdl/progress.html> or by writing or calling Valentina Cabrera Stagno. Underlying documentation comprising the record for these TMDLs is available for public inspection at the above address.

FOR FURTHER INFORMATION CONTACT: Valentina Cabrera Stagno at (415) 972-3434 or cabrera-stagno.valentina@epa.gov.

SUPPLEMENTARY INFORMATION: Section 303(d) of the Clean Water Act requires states to identify water bodies that do not meet water quality standards and then to establish TMDLs for each water body for each pollutant of concern. TMDLs identify the maximum amount of pollutants that can be discharged to water bodies without causing violations of water quality standards. Echo Park Lake, Lincoln Park Lake, Peck Road Park Lake, Lake Calabasas, Lake Sherwood, Puddingstone Reservoir, Legg Lakes, Santa Fe Dam Park and El Dorado Park Lakes are included on the State of California's Section 303(d) list

of polluted waters due to water quality impacts associated with nutrients, mercury, chlordane, DDT, PCBs and trash. EPA will establish TMDLs for these lakes by March 2012 because of deadlines under a consent decree (*Heal the Bay Inc., et al. v. Browner* C 98-4825 SBA, entered March 24, 1999).

Dated: April 27, 2010.

Alexis Strauss,

Director, Water Division, EPA Region IX.

Draft Toxicological Review of Hexachloroethane: In Support of the Summary Information in the Integrated Risk Information System (IRIS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Public Comment Period and Listening Session.

SUMMARY: EPA is announcing a 60-day public comment period and a public listening session for the external review draft document titled "Toxicological Review of Hexachloroethane: In Support of Summary Information on the Integrated Risk Information System (IRIS)" (EPA/635/R-09/007). The draft document was prepared by the National Center for Environmental Assessment (NCEA) within the EPA's Office of Research and Development (ORD). The public comment period and the external peer-review workshop, which will be scheduled at a later date and announced in the **Federal Register**, are separate processes that provide opportunities for all interested parties to comment on the document. EPA intends to forward the public comments that are submitted in accordance with this notice to the external peer-review panel prior to the meeting for their consideration. When finalizing the draft document, EPA intends to consider any public comments that EPA receives in accordance with this notice.

EPA is also announcing a listening session to be held on June 16, 2010, during the public comment period for this draft document. This listening session is a step in EPA's revised IRIS process, announced on May 21, 2009, to develop human health assessments for inclusion in the IRIS database. The purpose of the listening session is to allow all interested parties to present scientific and technical comments on
