Agenda: The committee will discuss, make recommendations, and vote on a premarket approval application, sponsored by Medical Enterprises, Ltd., for a drug/device combination product designed to prevent recurrence of bladder cancer. Synergo SB-3TS 101.1 Device with Mitomycin C is indicated for use for prophylactic treatment of recurrence in patients following endoscopic removal of Ta-T1 and G1-3 superficial transitional cell carcinoma of the bladder (STCCB). Ta-T1 refers to the stage of the tumor, which is a measure of how deep the tumor penetrates into the bladder wall, with Ta and T1 being the most superficial stages for raised bladder tumors. G1-3 refers to the tumor grade, which is a measure of how aggressive the tumor is likely to grow, with G1 being the least aggressive, and G3 the most. Synergo and Mitomycin C treatment is clinically indicated for STCCB patients of intermediate and high risk.
