

do so. All submissions from organizations and businesses, or from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety.

A draft EIS will be prepared for public review and comment. The comment period on the draft EIS will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**. It is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Bureau of Land Management at a time when it can meaningfully consider them and respond to them in the final EIS.

To assist the agencies in identifying and considering issues and concerns on the proposed action, comments on the draft EIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft EIS or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

The lead agencies believe, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft EISs must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft EIS stage but that are not raised until after completion of the final EIS may be waived or disregarded by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986); and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980).

Preliminary Issues

Issues and alternatives to be evaluated in the analysis for the Greens Hollow coal lease tract will be determined through public scoping. The major issues are expected to include water resources, wildlife and wildlife habitat, vegetation, cultural/paleontological

resources, employment in the local area, and economic viability of the local and regional areas.

Permits or Licenses Required

The operator must obtain a permit from the Secretary of the Interior prior to commencing mining, contingent upon review and acceptance of the mining and reclamation plan in accordance with Surface Mining Control and Reclamation Act of 1977 (SMCRA) and the requirements of 30 CFR 700 to end.
