SUPPLEMENTARY INFORMATION:

I. Background

Migrant and Seasonal Agricultural Worker Protection Act (MSPA) section 401 (29 U.S.C. 1841) requires, subject to certain exceptions, all Farm Labor Contractors (FLCs), Agricultural Employers (AGERs), and Agricultural Associations (AGASs) to ensure that any vehicle they use or cause to be used to transport or drive any migrant or seasonal agricultural worker conforms to safety and health standards prescribed by the Secretary of Labor under the MSPA and with other applicable Federal and State safety standards. These MSPA safety standards address the vehicle, driver, and insurance. The Wage and Hour Division

(WHD) has created Forms WH-514, WH-514a, and WH-515, which allow FLC applicants to verify to the WHD that the vehicles used to transport migrant/seasonal agricultural workers meet the MSPA vehicle safety standards and that anyone who drives such workers meets the Act's minimum physical requirements. The WHD uses the information in deciding whether to authorize the FLC/FLC Employee applicant to transport/drive any migrant/seasonal agricultural worker(s) or to cause such transportation. Form WH-514 is used to verify that any vehicle used or caused to be used to transport any migrant/seasonal agricultural worker(s) meets the Department of Transportation (DOT) safety standards. When the adopted DOT rules do not apply, FLC applicants seeking authorization to transport any migrant/seasonal agricultural workers use Form WH-514a to verify that the vehicles meet the DOL safety standards and, upon the vehicle meeting the required safety standards, the form is completed. Form WH-515 is a doctor's certificate used to document that a motor vehicle driver or operator meets the minimum DOT physical requirements that the DOL has adopted. This information collection is currently approved for use through August 31, 2010.

II. Review Focus

The DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

The DOL seeks the approval of the extension of the subject information collection requirements in order to verify that FLCs, AGERs, and AGASs have complied with the applicable

safety standards as a condition of their transportation and/or driving authorization.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. NUCLEAR REGULATORY COMMISSION

[NRC-2010-0018]

Draft Regulatory Guide: Issuance, Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Issuance and Availability of Draft Regulatory Guide, DG-8037, Information Relevant to Ensuring that Occupational Radiation Exposures at Medical Institutions Will be as Low as is Reasonably Achievable.

FOR FURTHER INFORMATION CONTACT:

Mohammad Saba, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: (301) 251-7558 or e-mail to Mohammad.Saba@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), entitled, "Information Relevant to Ensuring that Occupational Radiation Exposures at Medical Institutions Will

be as Low as is Reasonably Achievable," is temporarily identified by its task number, DG-8037, which should be mentioned in all related correspondence. DG-8037 is a proposed Revision 2 of Regulatory Guide 8.18, dated October 1982.

This guide is directed specifically toward medical licensees and recommends methods that the staff of the NRC considers acceptable to maintain occupational exposures as low as is reasonably achievable (ALARA) in medical institutions. In a medical institution, certain persons other than employees are exposed to radiation from licensed radioactive material. These persons include visitors, as well as patients other than those being treated with radioactive material. This guide addresses the protection of these individuals. The content of this guide is also applicable to veterinary medical institutions, insofar as specific diagnostic or therapeutic procedures are performed. Similar protection practices are applicable for keeping employee and visitor exposures ALARA, whether the patients are animal or human.
