

Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

■ Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. Section 39.13 is amended by removing Amendment 39–12283 (66 FR 34102, June 27, 2001), and by adding a new airworthiness directive (AD), Amendment 39–13123, to read as follows:

2001–13–03 R1 Kaman Aerospace

Corporation: Amendment 39–13123. Docket No. 2000–SW–50–AD. Revises AD 2001–13–03, Amendment 39–12283, Docket No. 2000–SW–50–AD.

Applicability: Model K–1200 helicopters, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in 2 accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the rotor shaft, teeter pin assembly, or flap clevis due to fatigue cracks, and subsequent loss of control of the helicopter, accomplish the following:

(a) Before further flight, remove any rotor shaft, part number (P/N) K974112–001, –003, –005, –007, –009, or –101, that has 3,750 or more hours time-in-service (TIS) and replace it with an airworthy part. Remove any teeter pin assembly, P/N K910005–007 or –009, that has 550 or more hours TIS and replace it with an airworthy part. Remove any flap

clevis assembly, P/N K911049–001, –003, or –005, that has 640 or more hours TIS, and replace it with an airworthy part.

(b) This AD revises the Limitations section of the maintenance manual by removing the life limit of 640 hours TIS established for the flap clevis, P/N K911049–021. The life limit for each rotor shaft, P/N K974112–001, –003, –005, –007, –009, and –101 remains at 3,750 hours TIS; the life limit for each teeter pin assembly, P/N K910005–007 and –009, remains at 550 hours TIS; and the life limit for each flap clevis assembly, P/N K911049–001, –003, and –005 remains at 640 hours TIS.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Boston Aircraft Certification Office, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Boston Aircraft Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Boston Aircraft Certification Office.

(d) Special flight permits will not be issued.

(e) This amendment becomes effective on May 27, 2003.

Issued in Fort Worth, Texas, on April 9, 2003.

Michele M. Owsley,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

14 CFR Part 71

[Docket No. FAA–2002–14044; Airspace Docket No. 02–AGL–22]

Establishment of Class E Airspace; Cavelier, ND

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace at Cavelier, ND. An area Navigation (RNAV) Standard Instrument Approach procedure (SIAP) has been developed for Cavelier Municipal Airport. Controlled airspace extending upward from 700 feet or more above the surface of the earth is needed to contain aircraft executing this approach. This action establishes controlled airspace for Cavelier Municipal Airport.

EFFECTIVE DATE: 0901 UTC, July 10, 2003.

FOR FURTHER INFORMATION CONTACT: Denis C. Burke, Air Traffic Division,

Airspace Branch, AGL–520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (847) 294–7568.

SUPPLEMENTARY INFORMATION:

History

On Friday, January 17, 2003, the FAA proposed to amend 14 CFR part 71 to establish Class E airspace at Cavelier, ND (68 FR 2460). The proposal was to establish controlled airspace extending upward from 700 feet or more above the surface of the earth to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal operation and while transiting between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9K dated August 30, 2002, and effective September 16, 2002, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 establishes Class E airspace at Cavelier, ND, to accommodate aircraft executing instrument flight procedures into and out of Cavelier Municipal Airport. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 95665, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1. of the Federal Aviation Administration Order 7400.9K, Airspace Designations and Reporting Points, dated August 30, 2002, and effective September 16, 2002, is amended as follows:

* * * * *

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AGL ND E5 Cavelier, ND [New]

Cavelier, Cavelier Municipal Airport, ND
(Lat. 48°47'02"N., long. 97°37'55"W.)

That airspace extending upward from 700 feet above the surface within a 6.3-mile radius of the Cavelier Municipal Airport.
