Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019. FAA Order 7400.11D is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11D lists Class A, B, C, D, and E airspace areas,

air traffic service routes, and reporting points.

The Proposal

The FAA proposes an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 to establish Class E airspace extending upward from 700 feet above the surface in Norway, ME, providing the controlled airspace required to support the new RNAV (GPS) standard instrument approach procedures for IFR operations at Norway Heliport.

Class E airspace designations are published in Paragraph 6005, of FAA Order 7400.11D, dated August 8, 2019, and effective September 15, 2019, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures", prior to any FAA final regulatory action.

II. Background and Purpose

The Federal Death Penalty Act provides generally that a capital sentence in a Federal case is to be implemented "in the manner prescribed by the law of the State in which the sentence is imposed." 18 U.S.C. 3596(a). However, if the "law of the State in which the sentence is imposed" "does not provide for implementation of a sentence of death," then the statute directs the court to designate another State whose law does "provide for the implementation of a sentence of death," "and the sentence shall be implemented in the latter State in the manner prescribed by such law." *Id.*

The current execution regulations of the Department direct the attorney for the government to "file with the sentencing court a proposed Judgment and Order" stating that "[t]he sentence shall be executed by intravenous injection of a lethal substance or substances in a quantity sufficient to cause death." 28 CFR 26.2(a). The regulations further state that, except to the extent a court orders otherwise, a sentence of death shall be executed on a date and at a time and at a "federal penal or correctional institution designated by the Director of the Federal Bureau of Prisons . . . [b]y intravenous injection of a lethal substance or substances in a quantity sufficient to cause death." *Id.* § 26.3(a). Furthermore, the Federal Bureau of Prisons facility for carrying out executions, located at the
