SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501–3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60 days' notice to the public to allow comment on information collection activities before seeking OMB approval of the activities. *See* 44 U.S.C. 3506, 3507; 5 CFR 1320.8 through 1320.12. Specifically, FRA invites interested parties to comment on the following ICR regarding: (1) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (2) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information

collection activities on the public, including the use of automated collection techniques or other forms of information technology. *See* 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

FRA believes that soliciting public comment may reduce the administrative and paperwork burdens associated with the collection of information that Federal regulations mandate. In summary, comments received will advance three objectives: (1) reduce reporting burdens; (2) organize information collection requirements in a “user-friendly” format to improve the use of such information; and (3) accurately assess the resources expended to retrieve and produce information requested. *See* 44 U.S.C. 3501.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

Title: Railroad Noise Emission Compliance Regulations.

OMB Control Number: 2130–0527

Abstract: Under authority granted by the Noise Control Act of 1972, the Environmental Protection Agency (EPA) has established limits for noise

emissions related to rail carriers in 40 CFR part 201. Those limits are enforced by FRA under 49 CFR part 210. Specifically, § 210.27 requires that all new locomotives be tested and certified to comply with the noise emission standards.

The information collected under § 210.27 is used by FRA to confirm that new locomotives are tested and do not emit noise that exceeds the maximum noise standards, in order to control harmful noise and promote public health and welfare.

In this 60-day notice, FRA made no adjustments to the previously approved burden hours and responses in the OMB, Office of Information and Regulatory Affairs (OIRA) inventory.¹

Type of Request: Extension without change of a currently approved collection.

Affected Public: Businesses.

Form(s): N/A

Respondent Universe: 4 locomotive manufacturers.

Frequency of Submission: On occasion.

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

¹ Changes to the total cost equivalent in U.S. dollars, a category not included in the OIRA inventory, are due to updated statistics from the 2023 Surface Transportation Board (STB) Full Year Wage A&B data series.

² The dollar equivalent cost is derived from the 2023 Surface Transportation Board Full Year Wage A&B data series using employee group 200 (Professional Administrative Staff) hourly wage rate of \$50.93. The total burden wage rate (straight time

plus 75%) used in the table is \$89.13 (\$50.93 × 1.75 = \$89.13).
