

instrument will provide CDC the opportunity to survey a population that is key to advancing the Division of Viral Hepatitis strategic plan to eliminate viral hepatitis in the U.S.

The overarching goals for this data collection are: (1) to reduce new viral hepatitis infections; (2) to reduce viral hepatitis-related morbidity and mortality; and (3) to reduce viral hepatitis-related disparities. The information collected will allow CDC to be good stewards of resources by guiding programmatic initiatives and allocation of funding sources. Data from this project will be used to inform

program planning and evaluation of prevention programs that aim to reduce new viral hepatitis infections, reduce viral hepatitis-related morbidity and mortality and reduce viral hepatitis-related disparities. The data collected will establish a system for ongoing program evaluation and improvement and allows for data-driven resource allocation to areas of greatest need. Invitations will be sent to 101 State and Local DOCs, to include the District of Columbia. The request to complete this anonymous electronic survey will include enough time for record searches. This survey has branching

logic to reduce the number of questions asked to each respondent if the question does not apply. Participating institutions will have a set-time period, to complete the survey. This survey will be self-administered which may take up to 30 minutes to complete using an electronic platform. If preferred, there will be an option to complete an interviewer-administered survey via telephone or videoconferencing.

CDC requests OMB approval for an estimated 60 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATES OF ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
State and local Department of Corrections (DOC) prison and jails, to include District of Columbia.	Assessing Capacity to Expand Hepatitis C Testing and Treatment in United States Carceral Systems.	101	1	30/60	60
Total					60

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled “Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery” to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on March 14, 2024 to obtain comments from the public and affected agencies. CDC did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular

information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery (OMB Control No. 0920–0953, Exp. 10/31/2024)—Extension—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The information collection activities associated with this project provide a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Federal Government’s commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions but are not statistical surveys that yield quantitative results that can be generalized to the population of study. The feedback will provide insights into customer or stakeholder perceptions,

experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management. The solicitation of feedback will target areas such as: timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

CDC will only submit a collection for approval under this Generic Clearance if they meet the following conditions:

- The collections are voluntary;
- The collections are low-burden for respondents (based) on considerations of total burden hours, total number of respondents (or burden-hours per respondent), and are low-cost for both the respondents and the Federal Government;

- The collections are noncontroversial and do not raise issues of concern to other Federal agencies;
 - Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
 - Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
 - Information gathered is intended to be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency (if released, the agency must indicate the qualitative nature of the information);
 - Information gathered will not be used for the purpose of substantially informing influential policy decisions; and
 - Information gathered will yield qualitative information (the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study).
- Feedback collected under CDC Generic Clearances provides useful information, but it does not yield data that can be generalized to the overall population. This type of Generic Clearance for qualitative information will not be used for quantitative

information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: the target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential nonresponse bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other Generic Clearance mechanisms that are designed to yield quantitative results.

As a general matter, information collections will not result in any new System of Records containing Privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

CDC requests OMB approval for an estimated 13,075 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Type of collections	Number of respondents	Annual frequency per response	Hours per response
Individuals and Households, Businesses and Organizations, State, Local or Tribal Government.	Print Surveys	50,000	1	15/60
	Focus Groups	100	1	2
	Online Surveys	1500	1	15/60

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10882]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995

(PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to
