

November 14, 2013. These time frames were selected because it corresponds with the closure of the Army Corps of Engineering Hiram M. Chittenden lock immediately upstream or inland of the bridge on the Lake Washington Ship Canal. This stretch of the Lake Washington Ship Canal experiences heavy waterway usage and is utilized by vessels ranging from commercial tug and barge to pleasure craft.

Vessels able to pass through the bridge in the closed positions may do so at anytime. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: August 27, 2013.
