**SUPPLEMENTARY INFORMATION:**

## I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing a revision to an existing guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

Proposed revision 1 of Regulatory Guide 8.2, "Administrative Practices in Radiation Surveys and Monitoring," was issued with a temporary identification as Draft Regulatory Guide, DG-8035 on August 30, 2010 (75 FR 52996). This guidance sets forth the NRC staff's views of acceptable administrative practices associated with surveys and monitoring of radiation arising from NRC licensed activities. This guidance is intended primarily for NRC licensee administrative and management personnel that are involved in, or are planning to initiate, activities involving the handling of radioactive materials or exposure to radiation.

The administrative requirements for surveys and monitoring of radiation are specified in Title 10, of the *Code of Federal Regulations*, part 20, "Standards for Protection against Radiation" (10 CFR part 20), and are applicable to all NRC-licensed activities. Part 20 requires surveys in order to evaluate the significance of radiation levels that may be present. In addition, part 20 requires radiation monitoring in order to obtain measurements for the evaluation of potential exposures and doses.
