

radio management panel (RMP) function installed by Airbus modification 207423.

**(d) Subject**

Air Transport Association (ATA) of America Code 23, Communications.

**(e) Unsafe Condition**

This AD was prompted by reports of loss of data synchronization between RMPs and the audio management unit (AMU). The FAA is issuing this AD to address loss of radio communication, uncommanded changes of transponder and traffic alert and collision

avoidance system (TCAS) settings, and activation of standby navigation mode on all RMPs. This condition, if not corrected, could result in total loss of radio communication if RMP 3 is inoperative prior to dispatch, including loss of transponder functionality and standby navigation.

**(f) Compliance**

Comply with this AD within the compliance times specified, unless already done.

**(g) Airplane Flight Manual (AFM) Revision**

Within 7 days after the effective date of this AD, revise the Emergency Procedures section of the existing AFM to include the information in figure 1 to paragraph (g) of this AD. This may be done by inserting a copy of figure 1 to paragraph (g) of this AD into the existing AFM. Using a different document with information identical to that contained in figure 1 to paragraph (g) of this AD is acceptable for compliance with the requirements of this paragraph.

**Figure 1 to Paragraph (g)—AFM Procedure**

**Dual Loss of RMP Data Synchronization**

Switch off RMP 1 and RMP 2.

Note: When RMP 1 and RMP 2 are switched off:

- The aural alerts are not available on loudspeakers.
- The communication is only available on RMP 3.

Check communication, transponder, TCAS and radio navigation settings.

**(h) Minimum Equipment List (MEL) Revision**

Before further flight after accomplishing the requirements of paragraph (g) of this AD, revise the existing FAA-approved MEL to prohibit airplane dispatch (operation) with an inoperative RMP 3 under the MEL item equivalent to FAA master minimum equipment list (MEL) 23-81-01.

**(i) Credit for Previous Actions**

(1) This paragraph provides credit for the AFM revision required by paragraph (g) of this AD, if the revision was performed before the effective date of this AD using Airbus A330/A340 Operations Engineering Bulletin (OEB) 58, issue 1.0, dated February 7, 2025.

(2) This paragraph provides credit for the AFM revision required by paragraph (g) of this AD, if the revision was performed before the effective date of this AD using Airbus A330 Airplane Flight Manual Temporary Revision TR819, Issue 1, dated March 6, 2025.
