NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-348 and 50-364]

Southern Nuclear Operating Company, Inc., et al.; Joseph M. Farley Nuclear Plant, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of amendments to Facility Operating License Nos. NPF-2 and NPF-8, issued to Southern Nuclear Operating Company Inc., et al. (the licensee), for operation of the Joseph M. Farley Nuclear Plant, Units 1 and 2, located in Houston County, Alabama.

Environmental Assessment

Identification of Proposed Action

The proposed action would amend the Facility Operating Licenses (FOLs) for Joseph M. Farley Nuclear Plant, Units 1 and 2, and to delete license conditions that have been completed or are otherwise no longer in effect. These activities have now been completed and the license conditions are either obsolete or are no longer needed.

The proposed action is in response to the licensee's application dated December 8, 2000.

The Need for the Proposed Action

When the FOLs, NPF-2 and NPF-8, were issued to the licensee, the NRC staff deemed certain issues essential to safety and/or essential to meeting certain regulatory interests. These issues were imposed as license conditions in the FOLs, with deadlines for their implementation. Since the units were licensed to operate in the late 1970s and early 1980s, most of these license conditions have been fulfilled. For the license conditions that have been fulfilled, the licensee proposed to have them deleted from the FOLs.

The licensee also proposed to make changes to correct administrative errors such as words inadvertently omitted, documents erroneously cited, etc.

The proposed amendments involve administrative changes to the FOLs only. No actual plant equipment, regulatory requirements, operating practices, or analyses are affected by these proposed amendments.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that there is no significant environmental impact if the amendments are granted. No changes will be made to the design and licensing bases, and applicable procedures at the two units at the Joseph M. Farley Nuclear Plant, Units 1 and 2, will remain the same. Other than the administrative changes, no other changes will be made to the FOLs, including the Technical Specifications.

The changes will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not involve any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the Commission concludes that there are no significant
