SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning rights in data and copyrights. Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

DATES: Submit comments on or before May 19, 2004.

ADDRESSES: Submit comments including suggestions for reducing this burden to the General Services Administration, FAR Secretariat, 1800 F Street, NW., Room 4035, Washington, DC 20405.

SUPPLEMENTARY INFORMATION:

A. Purpose

Rights in Data is a regulation which concerns the rights of the Government, and organizations with which the Government contracts, to information developed under such contracts. The delineation of such rights is necessary in order to protect the contractor's rights to not disclose proprietary data and to insure that data developed with public funds is available to the public.

The information collection burdens and recordkeeping requirements included in this regulation fall into the following four categories:

(a) A provision which is to be included in solicitations where the proposer would identify any proprietary data he would use during contract performance in order that the contracting officer might ascertain if

such proprietary data should be delivered.

(b) Contract provisions which, in unusual circumstances, would be included in a contract and require a contractor to deliver proprietary data to the Government for use in evaluation of work results, or is software to be used in a Government computer. These situations would arise only when the very nature of the contractor's work is comprised of limited rights data or restricted computer software and if the Government would need to see that data in order to determine the extent of the work.

(c) A technical data certification for major systems, which requires the contractor to certify that the data delivered under the contract is complete, accurate and compliant with the requirements of the contract. As this provision is for major systems only, and few civilian agencies have such major systems, only about 30 contracts will involve this certification.

(d) The Additional Data Requirements clause, which is to be included in all contracts for experimental, developmental, research, or demonstration work (other than basic or applied research to be performed solely by a university or college where the contract amount will be \$500,000 or less). The clause requires that the contractor keep all data first produced in the performance of the contract for a period of three years from the final acceptance of all items delivered under the contract. Much of this data will be in the form of the deliverables provided to the Government under the contract (final report, drawings, specifications, etc.). Some data, however, will be in the form of computations, preliminary data, records of experiments, etc., and these will be the data that will be required to be kept over and above the deliverables. The purpose of such recordkeeping requirements is to insure that the Government can fully evaluate the research in order to ascertain future activities and to insure that the research was completed and fully reported, as well as to give the public an opportunity to assess the research results and secure any additional information. All data covered by this clause is unlimited rights data paid for by the Government.

Paragraph (d) of the Rights in Data-General clause outlines a procedure whereby a contracting officer can challenge restrictive markings on data delivered. Under civilian agency contracts, limited rights data or restricted computer software is rarely, if ever, delivered to the Government. Therefore, there will rarely be any

challenges. Thus, there is no burden on the public.
