Type of Review: Pending.

Title of Collection: Evaluation of Response to Intervention Practices for Elementary School Reading (School and Staff Practices).

OMB Control Number: 1850—New.

Agency Form Number(s): N/A.

Frequency of Responses: On Occasion.

Affected Public: State, Local or Tribal Government.

Total Estimated Number of Annual Responses: 4,720.

Total Estimated Annual Burden Hours: 11,886.

Abstract: The Evaluation of Response to Intervention (RtI) Practices for Elementary School Reading will inform the National Assessment of Individuals With Disabilities Education Improvement Act of 2004, and the choices of districts and schools, by studying the implementation and impact of practices to identify and intervene early with struggling readers, and when needed, determine students' eligibility for special education. The Department seeks clearance for instruments to collect data for an in-depth study of the design, implementation, and impact of RtI programs.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP12–15–000]

Cameron LNG, LLC; Notice of Intent To Prepare an Environmental Assessment for the Proposed BOG Liquefaction Project, and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the BOG Liquefaction Project involving construction and operation of facilities by Cameron LNG, LLC (Cameron LNG) in Cameron Parish, Louisiana. This EA will be used by the Commission in its decision-making process to determine whether the project is in the public interest.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the project. Your input will help the Commission staff determine what issues need to be evaluated in the EA. Comments may be submitted in written form or verbally. Further details on how to submit written comments are provided in the Public Participation section of this notice. Please note that the scoping period will close on January 13, 2012.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives are asked to notify their constituents of this proposed project and encourage them to comment on their areas of concern.

Summary of the Proposed Project

Cameron LNG plans to construct and operate facilities necessary to liquefy boil-off gas (BOG) at its existing liquefied natural gas (LNG) terminal in

Cameron Parish, Louisiana. According to Cameron LNG, the BOG Liquefaction Project would provide a more economical means of maintaining sufficient LNG in each of the terminal's storage tanks. Currently, BOG is sent out via delivery into the Cameron Interstate Pipeline.

The proposed BOG Liquefaction Project would consist of the following facilities:

- An electric-motor driven centrifugal refrigeration compressor;
- A cryogenic plate-fin heat exchanger;
- Ancillary aerial coolers, knockout vessels, pumps, and piping for the closed loop refrigeration cycle;
- Four small (less than 10,000 pounds each) pressure vessels for refrigerant;
- Interconnecting gas piping (4-inch-diameter) from the existing pipeline compressors to the liquefaction unit; and
- A single 3-inch-diameter interconnecting LNG line from the liquefaction unit back to the terminal's LNG return header.

The general location of the project facilities is shown in appendix 1.¹

Land Requirements for Construction

The BOG Liquefaction Project would occupy an area approximately 1 acre in size wholly within the existing terminal and would not require any new land.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers an authorization of a project. NEPA also requires us² to discover and address concerns the public may have about proposals. This process is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this notice, the Commission requests public comments on the scope of the issues to address in the EA. We will consider all filed comments during the preparation of the EA.

In the EA we will discuss impacts that could occur as a result of the construction and operation of the
