SUPPLEMENTARY INFORMATION: The Occupational Information Network (O*Net) Data Collection Program yields detailed characteristics of occupations and skills for over 800 occupations by obtaining information from job incumbents/occupational specialists on worker and job characteristics to populate the O*Net database. The O*Net database information is used for a wide range of purposes related to career counseling and development, curriculum design, human resources functions and workforce investment efforts. The data collection methodology includes contacting businesses/associations to gain their cooperation, and collecting information from employees of cooperating businesses/associations as well as occupational specialists. While not affecting public burdens, this ICR technically qualifies as a revision under the PRA. The agency has added a questionnaire comment box soliciting respondent feedback on the last page of the Background/Association Questionnaire and removed a question about apprenticeship from the Knowledge Questionnaire. The agency has also made minor editorial changes to cover materials, to be consistent with other DOL information collections.
