

Section 88.137(d) requires a DFMS administrator to securely transfer all information in the DFMS to another approved entity in the event it does not continue as the DFMS administrator at the end of its term.

Protective DFMS administrators must apply to, and be approved by, the Commission prior to commencing operation of the DFMS.

Sections 88.35(b) and 88.141(b) establish an Interim Access Mechanism, under which NNA users may access the 5040–5060 MHz band prior to the commencement of operation by the first DFMS administrator. As part of this mechanism, NNA users seeking to transmit in the band must first obtain concurrence from the Federal Aviation Administration for the requested use, and then submit to the FCC an online registration form making certain certifications. When a request for concurrence is submitted to the FAA for operations within the NRQZ, the request must state the date that notification to the NRQZ Administrator was made or provide an approval from the NRQZ Administrator.

These information collection requirements are designed to enable the implementation of the rules for NNA operations, including the establishment and operation of the automated process of frequency assignments through DFMSs. These direct frequency assignments will support highly reliable control links, and thereby help to safely integrate UAS flights into the National Airspace System (NAS) and promote the development of a diverse range of beneficial public and private uses of UAS technology. Without the required collections, the Commission would not be able to make this spectrum available for dynamic, short term assignments to support this important purpose.

Federal Communications Commission.

Marlene Dortch,

Secretary.
