

sold in the U.S. and equipped with the high efficiency A/C scroll compressor. MMC is requesting a credit value of 1.1 grams/mile. As MMC notes in their application, technologies improving the efficiency of A/C systems are subject to credit caps as noted in 40 CFR 86.1868–12. The rationale for the credit cap is the additional fuel consumption of A/C systems can never be reduced to zero, and the limits established by regulation reflect the maximum possible reduction in fuel consumption projected by EPA. To ensure manufacturers do not generate A/C efficiency credits which would exceed the maximum possible reductions projected by EPA, EPA has applied the A/C menu credit caps to A/C efficiency credits manufacturers have received using the alternative method process. Therefore, the appropriate A/C efficiency menu caps will also apply to MMC for their high efficiency A/C scroll compressor credit value. Details of the testing and analysis can be found in the manufacturer's application.

III. EPA Decision Process

EPA has reviewed the applications for completeness and is now making the applications available for public review and comment as required by the regulations. The off-cycle credit applications submitted by the manufacturers (with confidential business information redacted) have been placed in the public docket (see **ADDRESSES** section above) and on EPA's website at <https://www.epa.gov/ve-certification/compliance-information-light-duty-greenhouse-gas-ghg-standards>.

EPA is providing a 30-day comment period on this application for off-cycle credits described in this notice, as specified by the regulations. The manufacturer may submit a written rebuttal of comments for EPA's consideration or may revise an application in response to comments. After reviewing any public comments and any rebuttal of comments submitted by manufacturers, EPA will make a final decision regarding the credit request. EPA will make its decision available to the public by placing a decision document (or multiple decision documents) in the docket and on EPA's website at the same manufacturer-specific pages shown above.
