

responses to comments are included in the Final EIS.

The Final EIS evaluates the potential impacts of a range of reasonable alternatives: (1) Maximum Retention (of approximately 22,750 acres); (2) Modified Retention (of approximately 19,700 acres); and (3) Minimum Retention and Access (of approximately 10,100 acres and 11 miles of roads and training trails). The Final EIS also analyzes the potential impacts of the No-Action Alternative, under which Army use of the land would cease altogether when the lease expires in 2029. The Army has identified Alternative 2, Modified Retention, as the Preferred Alternative. To meet the mission of the Army, The Army based its preference on the ability of the alternative, as well as on public comments and environmental, social, technical, and economic considerations.

The Final EIS analyzes land use; biological resources; historic and cultural resources and cultural practices; hazardous substances and hazardous wastes; air quality and greenhouse gases; noise; geology, topography, and soils; water resources; socioeconomic; environmental justice; transportation and traffic; airspace; electromagnetic spectrum; utilities; and human health and safety.

The air quality, greenhouse gas, and environmental justice analyses were prepared according to now-rescinded Executive Orders, the Council on Environmental Quality's NEPA implementing regulations, which are in the process of being rescinded, and the Army's NEPA implementing regulations, which are now under revision. Because analysis regarding air quality, greenhouse gases, and environmental justice was already provided to the public for comment, such analysis is included in the Final EIS.

The Final EIS indicates that under Alternatives 1, 2, and 3, significant adverse impacts could occur on land use (land tenure), biological resources, cultural practices, and environmental justice. The Army has identified measures in the Final EIS to mitigate these adverse impacts.

The No-Action Alternative could have significant adverse impacts on biological resources, socioeconomic, and utilities, significant beneficial impacts on land use, cultural practices, and environmental justice, and less-than-significant impacts on all other resources.

The Army distributed the Final EIS to Native Hawaiian Organizations, Federal,

State, and local agencies and officials, and other stakeholders.
