

associated with a *Bt* PIP corn seed blend targeting rootworm (a Pioneer Hi-Bred International, Inc. product) were previously addressed in the February 2009 FIFRA SAP meeting (<http://www.epa.gov/scipoly/sap/meetings/2009/february/232009finalreport.pdf>).

During a February 1998 FIFRA SAP meeting (see <http://www.epa.gov/scipoly/sap/meetings/1998/february/finalfeb.pdf>), the Panel concluded that seed mixes should not be considered as a viable IRM refuge option for ECB and corn earworm in *Bt* corn. The concern was that ECB larvae can move from plant to plant within corn fields (including from refuge plants to *Bt* plants and vice-versa) which could reduce the effectiveness of the seed blend at preventing pest resistance. Subsequent to the 1998 SAP, new biological data and simulation modeling were developed to support the potential use of a seed blend IRM strategy in *Bt* corn. EPA's Office of Pesticide Programs has considered these data and has utilized the Office of Research and Development (ORD) POPGEN model to evaluate the risk of ECB resistance developing in a seed blend environment. The Agency is requesting the FIFRA SAP to address scientific issues associated with the SmartStax™ RIB IRM strategy relative to the effectiveness of block refuges currently required for lepidopteran pests of *Bt* corn.

#### *C. FIFRA SAP Documents and Meeting Minutes*

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of public meeting.

**SUMMARY:** The Environmental Protection Agency (EPA) will host a meeting of the Interagency Steering Committee on Radiation Standards (ISCORS) on November 9, 2010, in Washington, DC. The purpose of ISCORS is to foster early resolution and coordination of regulatory issues associated with radiation standards. Agencies represented as members of ISCORS include the following: EPA; Nuclear Regulatory Commission; Department of Energy; Department of Defense; Department of Transportation; Department of Homeland Security; Department of Labor's Occupational Safety and Health Administration; and the Department of Health and Human Services. ISCORS meeting observer agencies include the Office of Science and Technology Policy, Office of Management and Budget, Defense Nuclear Facilities Safety Board, as well as representatives from both the States of Illinois and Pennsylvania. ISCORS maintains several objectives: (1) Facilitate a consensus on allowable levels of radiation risk to the public and workers; (2) promote consistent and scientifically sound risk assessment and risk management approaches in setting and implementing standards for occupational and public protection from ionizing radiation; (3) promote completeness and coherence of Federal standards for radiation protection; and (4) identify interagency radiation protection issues and coordinate their resolution. ISCORS meetings include presentations by the chairs of the subcommittees and discussions of current radiation protection issues. Committee meetings normally involve pre-decisional intra-governmental discussions and, as such, are normally not open for observation by members of the public or media. This is the one ISCORS meeting out of four held each year that is open to all interested

members of the public. There will be time on the agenda for members of the public to provide comments. Summaries of previous ISCORS meetings are available at the ISCORS Web site, <http://www.iscorgs.org>. The final agenda for the November 9th meeting will be posted on the Web site shortly before the meeting.

**DATES:** The meeting will be held on November 9, 2010, from 1 p.m. to 4 p.m.

**ADDRESSES:** The ISCORS meeting will be held in Room 152 at the EPA building located at 1310 L Street, NW., in Washington, DC. Attendees are required to present a photo ID such as a government agency photo identification badge or valid driver's license. Visitors and their belongings will be screened by EPA security guards. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

- Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns and suggest alternatives.

3. **Environmental justice.** EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on

any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticides discussed in this document, compared to the general population.

## II. What action is the agency taking?

EPA is announcing its receipt of several pesticide petitions filed under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or modification of regulations in 40 CFR part 174 or part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that the pesticide petitions described in this notice contain the data or information prescribed in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petitions. Additional data may be needed before EPA can make a final determination on these pesticide petitions.

Pursuant to 40 CFR 180.7(f), a summary of each of the petitions that are the subject of this notice, prepared by the petitioner, is included in a docket EPA has created for each rulemaking. The docket for each of the petitions is available online at <http://www.regulations.gov>.

As specified in FFDCA section 408(d)(3), (21 U.S.C. 346a(d)(3)), EPA is publishing notice of the petition so that the public has an opportunity to comment on this request for the establishment or modification of regulations for residues of pesticides in or on food commodities. Further information on the petition may be obtained through the petition summary referenced in this unit.

The limit of quantification (LOQ) is 0.01 milligrams/kilograms (mg/kg) for most matrices except for very dry matrices, *e.g.*, pea hay, for which the LOQ is 0.05 mg/kg. An LC/MS/MS residue method has been used in the animal feeding studies and is proposed for enforcement purposes. The method involves the extraction of

analytes from animal matrices and LC/MS/MS detection. This method has been validated for the determination of penthiopyrad and its metabolites in chicken tissues, eggs, ruminant tissues and milk. The limit of quantification is 0.01 mg/kg for all animal matrix groups. Contact: Tawanda Maignan, (703) 308-8050, e-mail address:

#### Amended Tolerance

PP 0F7776. (EPA-HQ-OPP-2009-0012) Dow AgroSciences LLC, 9330 Zionsville Road, Indianapolis, IN 46268, proposes to reestablish the time-limited tolerances in 40 CFR 180.544 for indirect or inadvertent combined residues of the insecticide methoxyfenozide, (benzoic acid, 3-methoxy-2-methyl-, 2-(3,5-dimethylbenzoyl)-2-(1,1-dimethylethyl) hydrazide) and its metabolites RH-117,236 free phenol of methoxyfenozide; 3,5-dimethylbenzoic acid N-tert-butyl-N'-(3-hydroxy-2-methylbenzoyl) hydrazide, RH-151,055 glucose conjugate of RH-117,236; 3,5-dimethylbenzoic acid N-tert-butyl-N-[3-(β-D-glucopyranosyloxy)-2-methylbenzoyl]-hydrazide) and RH-152,072 the malonylglycosyl conjugate of RH-117,236, in or on the raw agricultural commodities: Vegetable, root and tuber, group 1 at 0.1 ppm; vegetable, leaves of root and tuber, group 2 at 0.2 ppm; vegetable, bulb, group 3 at 0.2 ppm; vegetable, legume, group 6 at 0.1 ppm; vegetable, foliage of legume, group 7 at 10 ppm; grain, cereal, forage, fodder, and straw, group 16 at 10 ppm; grass, forage, fodder and hay, group 17 at 10 ppm; animal feed, non-grass, group 18 at 10 ppm; and herb and spice, group 19 at 10 ppm. Rohm

and Haas Company, requested these tolerances under the Federal Food, Drug and Cosmetic Act, as amended by the Food Quality Protection Act of 1996. A Notice of Filing was submitted and published in the **Federal Register** of March 19, 2001 (66 FR 15443) (FRL 6766-7). Based on the data submitted by Rohm and Haas Company, the Agency determined that only time-limited tolerances for these residues could be established. The Final Rule was published in the **Federal Register** of September 20, 2002 (67 FR 59193) (FRL-7198-5) with time-limited tolerances expiring on September 30, 2007. To enable establishment of permanent tolerances, 24 additional rotational crop trials were requested. The data were submitted to the Agency on March 3, and June 17, 2003. A Final Rule extending these time-limited tolerances to September 30, 2010, was subsequently published in the **Federal Register** of March 5, 2008 (73 FR 11820) (FRL-8352-2). A further extension of the tolerances set to expire September 30, 2013, is needed to allow for conclusion of the Agency review of the additional rotational crop data. Adequate enforcement methods are available for determination of methoxyfenozide residues in plant commodities, based on the Rohm and Haas Company Technical Report No. 34-98-87, "Tolerance Enforcement Method for Parent RH-2485 in Pome Fruit". The available Analytical Enforcement Methodology was previously reviewed in the **Federal Register** of September 20, 2002 (67 FR 59193) (FRL-7198-5).
