### Federal Aviation Administration

#### Noise Exposure Map and Noise Compatibility Program Notice for General Mitchell International Airport, Milwaukee, WI

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Notice.

**SUMMARY:** The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by General Mitchell International Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR Part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for General Mitchell International Airport under Part 150 in conjunction with the noise exposure map, and that this program will be approved or disapproved on or before June 21, 2009.

**DATES:** *Effective Date:* The effective date of the FAA's determination on the noise exposure maps and of the start of its review of the associated noise compatibility program is December 24, 2008. The public comment period ends February 21, 2009.

**FOR FURTHER INFORMATION CONTACT:** Mr. Glen Orcutt, Federal Aviation Administration, Minneapolis Airport

District Office, 6020 28th Ave., South, Minneapolis, MN 55450, phone number (612) 713-4354. Comments on the proposed noise compatibility program should also be submitted to the above office.

**SUPPLEMENTARY INFORMATION:** This notice announces that the FAA finds that the noise exposure maps submitted for General Mitchell International Airport are in compliance with applicable requirements of Part 150, effective December 24, 2008. Further, FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before June 21, 2009. This notice also announces the availability of this program for public review and comment.

Under § 103 of Title I of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA noise exposure maps which meet applicable regulations and which depict non-compatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies, and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) Part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes to take to reduce existing non-compatible uses and prevent the introduction of additional non-compatible uses.

The General Mitchell International Airport submitted to the FAA on March 31, 2008 noise exposure maps, descriptions and other documentation that were produced during the FAR Part 150 Noise Compatibility Study Update. A final copy of the study was submitted to the FAA on December 17, 2008. It was requested that the FAA review this material as the noise exposure maps, as described in § 103(a)(1) of the Act, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under § 104(b) of the Act.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by the General

Mitchell International Airport. The specific documentation determined to constitute the noise exposure maps includes: Existing 2004 Noise Exposure Map (Figure D21) and Future 2009 Noise Exposure Map (Figure I1) on pages D44 and 14 of the Noise Compatibility Program. The FAA has determined that these maps for General Mitchell International Airport are in compliance with applicable requirements. This determination is effective on December 24, 2008. FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or constitute a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under § 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of § 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted those maps, or with those public agencies and planning agencies with which consultation is required under § 103 of the Act. The FAA has relied on the certification by the airport operator, under § 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for General Mitchell International Airport, also effective on December 24, 2008. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by
