

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Federal and State correctional facility administrators and correctional officers. This collection is the only effort that provides an ability to assess the use of body armor by correctional officers to mitigate the risks associated with prison environments. There is little data on body armor use by correctional officers, such as the proportion who have body armor, the rate of use, the decision-making factors which inform use, and the effects of institutional policies on use rates. This will be the first nationally representative survey of corrections officers to understand the context of using armor in correctional settings and establish a prioritized list of factors affecting the use of armor. This collection will enable Federal and State corrections officers; Federal and State corrections administrators; local and tribal corrections personnel; legislators; researchers; and government agencies to understand the risks faced by corrections officers, to identify key barriers to the use of body armor, and to develop approaches to overcome those barriers.

(a) For the Body Armor Administrative Agency-Level Survey, the chief executive officer from 130 correctional facilities selected from a census directory of all Federal and State prisons will be asked to select one administrator to respond.

(b) For the Body Armor Individual-level Correctional Officer Survey, cross-sectional random samples of correctional officers of all ranks will be asked to respond from each of the 130 facilities queried in the Administrative Survey to obtain a representative sample of 1,089 correctional officers from the nation's Federal and State prisons.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* For the Body Armor Administrative Agency-Level Survey, the chief executive officer from 130 correctional facilities selected from a census directory of all Federal and State prisons will be asked to select one administrator to respond to a survey that will require an estimated maximum of 45 minutes to complete. For the Body Armor Individual-level Correctional Officer Survey, 1,089 correctional officers of all ranks from the 130 facilities from the Administrative Survey will be asked to respond to a survey that will require an estimated maximum of 45 minutes to complete. The officers will be selected from cross-sectional random samples to obtain a

representative sample from across the nation's Federal and State prisons.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 915 total burden hours associated with this collection.
