**NUCLEAR REGULATORY COMMISSION**

[NRC–2020–0171]

**Setpoints for Safety-Related Instrumentation**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Draft regulatory guide; request for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG–1363, “Setpoints for Safety-Related Instrumentation.” This DG is proposed Revision 4 of Regulatory Guide (RG) 1.105. The proposed revision describes an approach that is acceptable to the staff of the NRC to meet regulatory requirements ensuring that setpoints for safety related instrumentation are established and maintained within the technical specification limits. This proposed guide has been revised to incorporate additional information regarding American National Standards Institute (ANSI)/International Society of Automation (ISA) Standard 67.04.01–2018, “Setpoints for Nuclear Safety Related Instrumentation,” since revision 3 of RG 1.105 was issued.

**DATES:** Submit comments by September 14, 2020. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. This public review and comment period is 30 days in duration, although the public review and comment period for draft RGs is usually 60 days. The shortened comment period is provided because the NRC has previously interacted with stakeholders on related industry and NRC guidance and the proposed revision endorses ANSI/ISA 67.04.01–2018 without any exceptions or clarifications. As a result, the NRC does not anticipate significant public comment. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

**ADDRESSES:** You may submit comments by any of the following methods:
