BILLING CODE 7510-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 70-3103-ML; ASLBP No. 04-826-01-ML]

Atomic Safety and Licensing Board; In the Matter of Louisiana Energy Services, L.P. (National Enrichment Facility); Notice of Hearing (Application to Possess and Use Nuclear Material To Enrich Natural Uranium by the Gas Centrifuge Process)

July 26, 2004.

Before Administrative Judges: G. Paul Bollwerk, III, Chairman, Dr. Paul B. Abramson, Dr. Charles N. Kelber.

This proceeding concerns the December 12, 2003 application of Louisiana Energy Services, L.P., (LES) for authorization to possess and use source, byproduct, and special nuclear material in order to enrich natural uranium to a maximum of five percent

uranium-235 (U235) by the gas centrifuge process. LES proposes to do this at a facility—denominated the National Enrichment Facility (NEF)—to be constructed near Eunice, New Mexico. In a January 30, 2004, issuance, the Commission provided notice of the receipt and availability of the LES application and of the opportunity for a hearing on the application. (*Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-3, 59 NRC 10 (2004).) That notice was published in the **Federal Register** on February 6, 2004. (69 FR 5873 (Feb. 6, 2004).) Responding to the February 2004 notice, two intervention petitions were filed by governmental entities associated with the State of New Mexico—the New Mexico Environment Department (NMED) and the Attorney General of New Mexico (AGNM)—while a third was submitted by two public interest organizations, the Nuclear Resource and Information Service and Public Citizen (NIRS/PC). Each of their hearing requests/petitions to intervene sought in accordance with 10 CFR 2.309 to interpose various contentions challenging the application. In response to those hearing requests, the petitions were referred by the Commission to the Atomic Safety and Licensing Board Panel to conduct any subsequent adjudication. On April 15, 2004, this Licensing Board was appointed to preside over this proceeding. (69 FR 22100 (Apr. 23, 2004).) The Board consists of Dr. Paul B. Abramson, Dr. Charles N. Kelber, and G. Paul Bollwerk, III, who serves as Chairman of the Board.

On June 15, 2004, the Board conducted an initial prehearing conference in Hobbs, New Mexico, during which it heard oral presentations regarding the admissibility of thirty-two contentions proffered by the petitioners. Thereafter, in a July 19, 2004 issuance the Board noted that all the petitioners have established the requisite standing to intervene in this proceeding and ruled that each has submitted at least one admissible contention concerning the LES application so that each can be admitted as a party to this proceeding. (*Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-04-14, 60 NRC ____ (July 19, 2004).)

In light of the foregoing, please take notice that a hearing will be conducted in this contested proceeding. This hearing will be governed by the formal hearing procedures set forth in 10 CFR part 2, subparts C and G (10 CFR 2.300-.390, 2.700-.713). Further, with respect to matters of law and fact regarding whether the LES application satisfies the standards set forth in the

Commission's January 30, 2004 order and the applicable standards in 10 CFR 30.33, 40.32, and 70.23 that are not covered by admitted contentions, without conducting a de novo evaluation of the application the Board will determine (1) whether the application and the record of the proceeding contain sufficient information and whether the NRC staff's review of the application has been adequate to support findings to be made by the Director of the Office of Nuclear Materials Safety and Safeguards, regarding the standards set forth above; and (2) whether the review conducted by the staff pursuant to 10 CFR part 51 is adequate. Also, in accordance with Subpart A of 10 CFR part 51, the Board in its initial decision will (1) determine whether the requirements of sections 102(2)(A), (C), and (E) of the National Environmental Policy Act of 1969 and 10 CFR part 51, subpart A, have been complied with in the proceeding; (2) independently consider the final balance among conflicting factors contained in the record of proceeding with a view to determining the appropriate action to be taken; and (3) determine whether a license should be issued, denied, or conditioned to protect the environment.

During the course of the proceeding, the Board may conduct an oral argument, as provided in 10 CFR 2.331, may hold additional prehearing conferences pursuant to 10 CFR 2.329, and may conduct evidentiary hearings in accordance with 10 CFR 2.327-.328, 2.711. The public is invited to attend any oral argument, prehearing conference, or evidentiary hearing. Notices of those sessions will be published in the **Federal Register** and/or made available to the public at the NRC Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, and through the NRC Web site, <http://www.nrc.gov>.

Additionally, as provided in 10 CFR 2.315(a), any person not a party to the proceeding may submit a written limited appearance statement. Limited appearance statements, which are placed in the docket for the hearing, provide members of the public with an opportunity to make the Board and/or the participants aware of their concerns about matters at issue in the proceeding. A written limited appearance statement can be submitted at any time and should be sent to the Office of the Secretary using one of the methods prescribed below:

[Docket No. 030-12998]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License; Amendment for Philadelphia Health & Education Corporation's Facility at the Eastern Pennsylvania Psychiatric Institute in Philadelphia, PA

AGENCY: Nuclear Regulatory
Commission.

ACTION: Notice of availability of
Environmental Assessment and Finding
of No Significant Impact.

FOR FURTHER INFORMATION CONTACT:

Randolph C. Ragland, Jr., Nuclear
Materials Safety Branch 1, Division of
Nuclear Materials Safety, Region I, 475
Allendale Road, King of Prussia,

email: rcr1@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission
(NRC) is considering the issuance of a
license amendment to Philadelphia
Health & Education Corporation for
Materials License No. 37-07438-15, to
authorize release of its facility located at
3200 Henry Avenue, Philadelphia, PA
for unrestricted use. NRC has prepared
an Environmental Assessment (EA) in
support of this action in accordance
with the requirements of 10 CFR part
51. Based on the EA, the NRC has
concluded that a Finding of No
Significant Impact (FONSI) is
appropriate. The amendment will be
issued following the publication of this
notice.

II. EA Summary

The purpose of the proposed action is
to authorize the release of the licensee's
3200 Henry Avenue, Philadelphia, PA
facility for unrestricted use. The Eastern
Pennsylvania Psychiatric Institute was
authorized by NRC as a location of use
from 1982 to use radioactive materials
for research and development purposes
at the site. On May 5, 2004,
Philadelphia Health & Education
Corporation requested that NRC release
the facility for unrestricted use.
Philadelphia Health & Education
Corporation has conducted surveys of
the facility and determined that the
facility meets the license termination
criteria in subpart E of 10 CFR part 20.
The NRC staff has prepared an EA in
support of the proposed license
amendment.

III. Finding of No Significant Impact

The staff has prepared the EA
(summarized above) in support of the
proposed license amendment to release
the facility for unrestricted use. The
NRC staff has evaluated Philadelphia
Health & Education Corporation's
request and the results of the surveys
and has concluded that the completed
action complies with the criteria in
subpart E of 10 CFR part 20. The staff
has found that the environmental
impacts from the proposed action are
bounded by the impacts evaluated by
the "Generic Environmental Impact
Statement in Support of Rulemaking on
Radiological Criteria for License
Termination of NRC-Licensed
Facilities" (NUREG-1496). On the basis
of the EA, the NRC has concluded that
the environmental impacts from the
proposed action are expected to be
insignificant and has determined not to
prepare an environmental impact
statement for the proposed action.

IV. Further Information

Documents related to this action,
including the applications for license
amendment and supporting
documentation, are available
