

The following request has been submitted to the Office of Management and Budget for review under the Paperwork Reduction Act of 1995:

Proposed Project: Data Collection Tool for the Black Lung Clinics Program: In Use Without Approval

The Bureau of Primary Health Care (BPHC), Health Resources and Services Administration (HRSA), conducts an annual data collection of user information for the Black Lung Clinics Program. The purpose of the Black Lung Clinics Program is to improve the health status of coal workers by providing services to minimize the effects of respiratory and pulmonary impairments

of coal miners. Grantees provide specific diagnostic and treatment procedures required in the management of problems associated with black lung disease which improve the quality of life of miners and reduce economic costs associated with morbidity and mortality arising from pulmonary diseases. The purpose of collecting these data is to provide HRSA with information on how well each grantee is meeting the needs of active and retired miners in the funded communities.

Data from the annual report will provide quantitative information about the programs, specifically: (a) The characteristics of the patients they serve

(gender, age, disability level, occupation type), (b) the characteristics of services provided (medical, non-medical, or counseling), and (c) number of patients served and visits conducted (encounters). This assessment will provide data useful to the program and will enable HRSA to provide data required by Congress under the Government Performance and Results Act of 1993. It will also ensure that the organizations funded have demonstrated a need for services in their communities and that funds are being effectively used to provide services to meet those needs.

The estimated burden is as follows:

Form name	Number of respondents	Responses per respondent	Total responses	Hours per response	Total burden hours
Database	15	1	15	10	150

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to: Desk Officer, Health Resources and Services Administration, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: June 14, 2004.

Director, Division of Policy Review and Coordination.

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35, as amended). The Housing Choice Voucher (HCV) Program is a major program of the Federal government for assisting very low-income families, the elderly, and the disabled to afford decent, safe, and sanitary housing in the private market. Since housing assistance is provided on behalf of the family or individual, participants are able to find their own housing, including single-family homes, townhouses and apartments.

Under section 8(y) of the United States Housing Act of 1937, as amended, a public housing agency may provide tenant-based assistance to an eligible family that purchases a dwelling unit the family will occupy. In implementation of this statute, a PHA may choose to administer a homeownership voucher program and provide homeownership assistance payments to eligible home buyers using funds available by HUD to the PHA under the housing choice voucher program. Homeownership assistance payments are made available by the PHA to assist participants in paying mortgage and other homeownership expenses.

Collection of accurate information regarding private home purchases under this program is vital to PIH's ability to measure the program usage and effectiveness, promote and further the purposes of the program, as well as to provide information to the public and to Congress regarding program implementation. The purpose of this survey is to contact public housing agencies to collect information regarding the number of homeownership closings, problems in reporting homeownership closings under PIH reporting systems, and to obtain information needed to plan the application of resources to further promote and expand the program.

This notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) enhance the quality, utility, and clarity of the information to be collected; and (4) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.
