**General Description of Collection:** The Interagency Appraisal Complaint Form is designed to collect information necessary for one or more agencies to take further action on a complaint from an appraiser, other individual, financial institution, or other entities. The FDIC will use the information to take further action on the complaint to the extent it relates to an issue within its jurisdiction. There is no change in the methodology or substance of this information collection. The decrease in total estimated annual burden from 58 hours in 2022 to 31 hours currently is due to a decrease in the estimated number of respondents.

**Request for Comment**

Comments are invited on (a) whether the collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

## Abstract

The Energy Policy Act of 1992 established federal programs to encourage the development of alternative fuels and alternative fueled vehicles (AFVs). Section 406(a) of the Act directed the Commission to establish uniform labeling requirements for alternative fuels and AFVs. 42 U.S.C. 13232(a). Such labels must provide “appropriate information with respect to costs and benefits [of alternative fuels and AFVs], so as to reasonably enable the consumer to make choices and comparisons.” The required labels must be “simple and, where appropriate, consolidated with other labels providing information to the consumer.”

Pursuant to the Act, the Commission published the Alternative Fuels Rule in 1995, and the Rule was later amended in 2013.<sup>2</sup> The Rule requires disclosure of specific information on labels posted on fuel dispensers for non-liquid alternative fuels. To ensure the accuracy of these disclosures, the Rule also requires that sellers maintain records substantiating product-specific disclosures they include on these labels. In addition, the Rule requires that distributors of non-liquid alternative vehicle fuel provide certifications of the fuel rating in each transfer to anyone who is not a consumer.

## Request for Comment

On January 28, 2025, the FTC sought public comment on the information collection requirements associated with the Rule. 90 FR 8296. The Commission received one germane comment from Imaging Inc., Cardiac, which encouraged the Commission to assess whether the information collection requirements are still efficient and not overly burdensome, particularly for small businesses. The Commission’s analysis and findings in this notice’s accompanying Supporting Statement address this concern. Pursuant to the OMB regulations, 5 CFR part 1320, that implement the PRA, 44 U.S.C. 3501 *et seq.*, the FTC is providing this second opportunity for public comment while seeking OMB approval to renew the pre-existing clearance for the Rules.

Statistics. See Table 1. National employment and wage data from the Occupational Employment Statistics survey by occupation, May 2024, at <https://www.bls.gov/news.release/ocwage.t01.htm>, which was made publicly available on April 2, 2025.

<sup>2</sup> 78 FR 23832 (April 23, 2013). The final amendments consolidated the Commission’s AFV labels with the then new fuel economy labels required by the Environmental Protection Agency thereby eliminating the FTC’s separate labeling requirements for used AFV labels.
