The conference was held in Washington, DC, on February 21, 2008, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determinations in these investigations to the Secretary of Commerce on March 17, 2008. SUPPLEMENTARY INFORMATION:

I. Background

In February 2006, under authority of section 414 of the American Competitiveness and Workforce Improvement Act of 1998, the Employment and Training Administration (ETA) awarded grants to 13 regions across the United States to support community efforts to link their varied knowledge resources with their business and innovation assets, and to ensure that their workforces have the skills and knowledge required to work effectively in new and emerging industries. In addition to grant funds, each of these grantees, collectively known as Generation I regions, is also eligible to receive access to ongoing technical assistance provided directly and indirectly from ETA. At the same time that these grants were awarded,

ETA selected another 13 regions to receive \$100,000 to support their participation in peer-to-peer grantee conferences (known as WIRED Academies) and other learning opportunities. In early 2007, ETA increased the funds awarded to these regions, at which time they became known as the Generation II regions. Finally, in June 2007, ETA awarded grants to 13 more regions, known as the Generation III regions.

The WIRED Initiative focuses on labor market areas that are comprised of multiple jurisdictions within states or across state borders. It supports innovative approaches to workforce development, training and education that go beyond traditional strategies for preparing workers to compete and succeed both within the United States and globally. Through the initiative and with support and guidance from their state Governors, WIRED regions have a unique opportunity to design and implement strategic approaches for coordinated regional economic development and job growth. For the grant awards, ETA selected regions that demonstrated the presence of labor market elements (unemployment, low-wages, low levels of new job creation) and economic conditions (such as industries that are declining or industries targeted for growth) that are driving the need for transformation. In addition, each grant recipient described how the region will: Implement new strategic efforts designed to drive integration among workforce, economic development and education systems; promote innovation in addressing challenges; and utilize and build upon existing structures, resources and legislatively-funded programs. Finally, each region outlined the presence of a strategic partnership that is representative of the entire economic region and is comprised of a strong team of regional leaders which will lead the regional transformation.

This data collection covers qualitative information to be obtained through on-site, unstructured interviews with representatives in each WIRED region.

Data to be collected includes information regarding the regional context, goals, planning, structure, partnerships, collaboration, activities, funding, challenges, innovations, approaches for measuring success, and sustainability.
