DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request Proposed Projects

Title: National Implementation of Head Start, National Reporting System on Child Outcomes.

OMB No.: 0970-0249.

Description: The Administration on Children, Youth and Families (ACYF), within Administration for Children and Families (ACF) of the Department of Health and Human Services (HHS), is requesting comments on plans to implement the Head Start National Reporting System on Child Outcomes. This implementation has been conducted to collect child-outcomes information that will be used to enhance Head Start program quality and accountability.

The Head Start National Reporting System (HSNRS) was designed to meet Presidentially mandated reforms and Congressionally mandated requirements for information on specific child outcomes and to provide Head Start program managers and teachers with useful information to support program-improvement strategies.

HSNRS has three major goals. First, HSNRS is intended to provide local Head Start programs with additional information regarding the progress of groups of children by capturing baseline information on how children are doing at the beginning and at the end of the program, in a limited number of areas. Second, HSNRS is intended to capture the same set of information across the nation in a consistent manner. This information can be used to plan for targeted training and technical assistance. Third, the child-outcomes information captured in HSNRS is intended to be used within the current program monitoring effort, which involves an onsite, systematic review of programs. HSNRS can create and compile information that the Head Start Bureau can utilize as part of the process for ensuring the effectiveness of services. These results also will be used to provide for program improvement and accountability of Head Start.

The first three rounds of the HSNRS national implementation (2003-04, 2004-05, and 2005-06 program years) have been successful. In each round of the data collection, over 400,000 assessments were completed, making this the largest assessment of preschool children ever conducted. Also, over 99 percent cooperation was obtained from local Head Start programs and Head Start parents and children. HSNRS data show good internal reliability, both in terms of I __ R __ T __ (IRT) reliability and Cronbach's Coefficient Alpha, at the individual child-level, for both English-language and Spanish-language assessments. IRT estimates of the internal reliability of the program-level, English-language assessment scores were excellent, with most IRT-reliability coefficients greater than .90.

Participating local Head Start programs have received HSNRS Program Reports at the aggregated program-level for the fall assessment (baseline) and the spring assessment (fall-spring growth), in each program year. These reports provided local Head Start programs with the progress of their children in all assessed domains, and showed how the reports compared to all other Head Start children (national-level reference tables) as well as children in similar programs (sub-group reference tables).

HSNRS will continue to collect child-outcomes information from children who are 4 years-old or older and who will enter Kindergarten next year. As in the previous three years, all eligible Head Start children will be assessed twice a year using a standardized direct child-assessment battery. The assessment battery will include a

limited set of early literacy, language, and numeracy skills.

Social-emotional development of Head Start children reported by classroom teachers will be collected in HSNRS twice a year using a standardized rating scale developed for HSNRS. The social-emotional

development scales will be field-tested in spring 2006 prior to national implementation in fall 2006. Head Start teachers will rate children in their classrooms on the aspects of cooperative classroom behaviors, preschool learning behaviors, and problem behaviors.

HSNRS will also collect health and safety information on children and programs, including children's height and weight, immunization status, receipt of dental care, and occurrences of injuries requiring medical attention.

Respondents: Head Start children and Head Start staff.
