#### **SUPPLEMENTARY INFORMATION:**

##### **Request for Information**

We, the U.S. Fish and Wildlife Service, published a 90-day finding on a petition to list the eastern population of the gopher tortoise (*Gopherus polyphemus*) as threatened in the **Federal Register** on September 9, 2009 (74 FR 46401). In that finding, we found that the petition presented substantial scientific or commercial information indicating that listing the eastern

population of the gopher tortoise may be warranted. We also initiated a status review to determine if listing the species is warranted, and asked the public to submit information to assist us in our status review. We asked the public to submit information by November 9, 2009, in order for us sufficient time to consider the information in the status review.

Since that time, several interested parties have notified us that they wish to submit additional information relevant to the listing of the eastern population of the gopher tortoise. They have indicated that the information could not be submitted before November 9, 2009, but could be submitted prior to the anticipated completion of the status review in 2010. We have advised these parties individually that we would continue to accept such information after November 9, 2009. However, to ensure that all interested parties have the same opportunity to provide relevant data, this notice clarifies that information to assist us in our review of the status of the gopher tortoise may be submitted to the *Federal eRulemaking Portal* through the date specified in **DATES**, and directly to the Field Office thereafter (see **DATES** and **ADDRESSES** above). This notice also corrects errors in contact information in the September 9, 2009, notice.

We are continuing to request information on the status of the gopher tortoise throughout its range. We request information from the public, other concerned governmental agencies, Native American Tribes, the scientific community, industry, or any other interested parties concerning the status of the eastern portion of the gopher tortoise's range. We are seeking information regarding:

- (1) The species' historical and current status and distribution, its biology and ecology, and ongoing conservation measures for the species and its habitat;
- (2) Information relevant to the factors that are the basis for making a listing determination for a species under section 4(a) of the Act, which are:

- a) The present or threatened destruction, modification, or curtailment of the species' habitat or range;

- b) Overutilization for commercial, recreational, scientific, or educational purposes;

- c) Disease or predation;

- d) The inadequacy of existing regulatory mechanisms; or

- e) Other natural or manmade factors affecting its continued existence and threats to the species or its habitat; and

- (3) Information related to the genetics, status, distribution, and threats to the

gopher tortoise in the eastern portion of its range.

Please note that submissions merely stating support for or opposition to the action under consideration without providing supporting information, although noted, will not be considered in making a determination, as section 4(b)(1)(A) of the Act (16 U.S.C. 1531 *et seq.*) directs that determinations as to whether any species is a threatened or endangered species must be made "solely on the basis of the best scientific and commercial data available." Based on our status review, we will issue a 12-month finding on the petition as provided in section 4(b)(3)(B) of the Act.

#### **Authority**

The authority for this action is section 4 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: December 28, 2009.
