Abstract: The Study of State Administration of Even Start and Statewide Family Literacy Initiative Grants will systematically describe the structure and processes associated with all major areas of Even Start administration at the state level. This information is needed by the U.S. Department of Education to enhance its capacity to monitor the development and improvement of the Even Start program and provide guidance and assistance to the states. This study will involve two data collection components: (1) Survey of State Even Start Coordinators which will include Even Start state coordinators and (2) State Even Start Case Study Interviews (telephone interviews with six state coordinators, and site visit interviews with six additional state coordinators and up to five additional state staff per each of these six states).

*Abstract:* Since April 1997, EDGAR's menu of selection criteria become effective. For each competition, the

Secretary would select one or more criteria that best enable the Department to identify the highest quality applications consistent with the program purpose, statutory requirements, and any priorities established. This allows the Secretary the flexibility to weigh the criteria according to the needs of each individual program. This menu of selection criteria will provide the Department the flexibility to choose a set of criteria tailored to a given competition and obviate the need to create specific selection criteria through individual program regulations. ED is requesting a streamlined clearance process for programs of approved applications who choose to change: (1) Criteria from the same EDGAR menu; (2) old EDGAR to new EDGAR criteria, or (3) program criteria to EDGAR criteria.
