

Manifest) system in partnership with industry and states by 2015. The Act also requires EPA to adopt an e-Manifest regulation authorizing e-Manifests that are created and transmitted through the use of the e-Manifest system by October 5, 2013. The e-Manifests will be deemed as the legal equivalent to Uniform Hazardous Waste Paper Manifest Form and Continuation Sheet (EPA Form 8700–22 and 8700–22a). The scope of e-Manifest will extend to all federally and state regulated wastes that require a manifest; use of e-Manifest, however, is optional to users. Although the Act states use of e-Manifest is optional, the Act authorizes EPA to collect e-Manifests and paper manifests in the system. Therefore, EPA intends to collect all manifests, both electronic and paper formats, in the system. For further information regarding the Hazardous Waste Electronic Manifest Act and the e-Manifest project in general, please refer to the following EPA Web site: <http://www.epa.gov/epawaste/hazard/transportation/manifest/e-man.htm>.

III. Current Activities on e-Manifest Project

Pursuant to the Act, EPA has begun its initial planning phase to begin the development and ultimately the deployment of the e-Manifest system by 2015. The purpose of the three face-to-face requirements gathering meetings is to continue with efforts conducted during previous public meetings and webinars by engaging stakeholders on current expectations and technical requirements for the e-Manifest system. The goals of the meetings will be to obtain input from future users as to their needs and the capability of the IT system to address performance standards for the success of an e-Manifest system. Additionally, EPA will be gathering input from stakeholders on what technical requirements or tools the agency should consider to ensure that it also establishes an IT reporting system that will enhance access to the data (including to states and the general public).

The topics of discussions at these meetings will cover the following functional requirements:

- e-Manifest workflow, including mobile field component and handler submission;
- e-Manifest business rule processing;
- Electronic signature (e-signature) and Cross-Media Electronic Reporting Regulation (CROMERR) conformance;
- Paper manifest processing;
- Data access and reporting;

- State data consumption and interaction;
- Data QA; and
- User administration and security.

EPA is currently determining the actual format and agenda for the meetings. It anticipates that each of the meetings will have a similar agenda, which will further our intent to provide multiple opportunities for stakeholder participation. Therefore, it is only necessary for participants to attend one of the three meetings.

All up to date information, including advanced copies of meeting materials and meeting logistics, is available on our Web site: <http://www.epa.gov/osw/hazard/transportation/manifest/e-man.htm>.

EPA will use stakeholder input gathered during these meetings to finalize the e-Manifest requirements and prepare for eventual system development.

III. Summary of Public Comments Received and Agency Response to Comments

During the public comment period provided, EPA received no comments in response to the December 5, 2012 (77 FR 72343) (FRL–9370–4) **Federal Register** notice announcing the Agency's receipt of the requests for voluntary cancellations of products listed in Table 1 of Unit II.

IV. Cancellation Order

Pursuant to FIFRA section 6(f), EPA hereby approves the requested cancellations of the registrations identified in Table 1 of Unit II. Accordingly, the Agency hereby orders that the product registrations identified in Table 1 of Unit II. are canceled. The effective date of the cancellations that are the subject of this notice is February 20, 2013. Any distribution, sale, or use of existing stocks of the products identified in Table 1 of Unit II. in a manner inconsistent with any of the provisions for disposition of existing

stocks set forth in Unit VI. will be a violation of FIFRA.

V. What is the agency's authority for taking this action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period, the EPA Administrator may approve such a request. The notice of receipt for this action was published for comment in the **Federal Register** issue of December 5, 2012. The comment period closed on January 4, 2013.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action. The existing stocks provisions for the products subject to this order are as follows.

The registrants may continue to sell and distribute existing stocks of products listed in Table 1 of Unit II. until February 20, 2014, which is 1 year after the publication of the Cancellation Order in the **Federal Register**. Thereafter, the registrants are prohibited from selling or distributing products listed in Table 1, except for export in accordance with FIFRA section 17, or proper disposal. Persons other than the registrants may sell, distribute, or use existing stocks of products listed in Table 1 of Unit II. until existing stocks are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the canceled products.
