

do so. We will always make submissions from organizations or businesses, and from individuals identifying themselves as representatives of or officials of organizations or businesses, available for public inspection in their entirety. A limited number of compact disks and printed copies of the Draft GMP/EIS will be made available at Fort Matanzas National Monument headquarters, 8635 A1A South, St. Augustine, FL 32080.

**SUPPLEMENTARY INFORMATION:** Public meetings, newsletters, and internet updates have kept the public informed and involved throughout the planning process. The draft GMP provides a framework for management, use, and development of the national park for the next 15 to 20 years. It presents and analyzes three alternatives: Alternative A (no action) provides a baseline for evaluating changes and impacts of the two action alternatives. Alternative B is the NPS Preferred Alternative. It would manage the Monument in a manner consistent with its history as a small military outpost within a sometimes harsh, but beautiful and rich natural environment. There would be minimal development of new facilities. Some expansion of existing parking lots could occur to improve visitor safety by reducing parking on road shoulders during peak periods. There would be increased emphasis on the interpretation of the natural environment. Driving on the Atlantic Ocean beach of Anastasia Island would continue to be prohibited in accordance with NPS regulation. Alternative B provides a higher level of resource protection than Alternative C. Alternative C would focus on interpretive and educational opportunities on the north end of the Anastasia Island (west of Highway A1A) section of the park, concentrating on the New Deal era visitor center and the land donations and other activities of St. Augustine organizations to restore and commemorate the Fort for local residents and tourists. The central and southern ends of Anastasia Island and the east side of Highway A1A would continue to be managed to protect and conserve the natural resources of the zone. Some additional land on the west side of Highway A1A would be available for trail development. In addition, following approval of the GMP, the NPS would seek to promulgate a special regulation to allow driving on part of the Atlantic Ocean Beach of Anastasia Island. This process would include an Off Road Vehicle Plan and Environmental Impact Statement. Alternative C provides a

higher level of recreational opportunities than Alternative B. The three alternatives are described in detail in chapter 2 of the draft plan. The key impacts of implementing the three alternatives are detailed in chapter 4 and summarized in chapter 2.

### Notice of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

Notice is hereby given that on June 12, 2012, the United States, on behalf of the U.S. Department of Agriculture, Forest Service, filed a Complaint and on June 13, 2012, lodged a proposed Consent Decree in *United States v. The Stearns Co., Ltd., and Stearns Enterprises, Inc.*, Case No. 12-cv-191-JMH (E.D. Ky.), relating to the Lower Rock Creek Mines Site in McCreary County, Kentucky (the "Site"). The Complaint seeks reimbursement from defendants, The Stearns Co., Ltd., and Stearns Enterprises, Inc., of environmental response costs incurred by the Forest Service at the Site and the entry of a declaratory judgment with respect to the Forest Service's future response costs under Sections 107(a) and 113(g) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"), 42 U.S.C. 9607(a) and 9613(g).

The proposed Consent Decree resolves the claims in the Complaint. Under the proposed Consent Decree, the defendants agree to the entry of a judgment in favor of the United States in the amount of \$31.8 million; the judgment can be satisfied, however, solely through the transfer of Defendants' real property interests (comprised primarily of mineral rights in the Site property) to the United States (reuniting the Forest Service's fee interest in the Site property with the mineral rights) and recoveries, if any, under Defendants' insurance policies. In addition, defendants agree to withdraw their application, pending with the U.S. Department of Interior's Office of Surface Mining and Enforcement, for a "compatibility determination" under the Surface Mining Control and Reclamation Act of 1977 with respect to defendants' mineral rights at the Site, thus avoiding the potential litigation

were DOI to act adversely on defendants' application.

Ref. 90-11-3-10012.

During the public comment period, the Consent Decree may be examined at the Daniel Boone National Forest Supervisor's Office, 1700 Bypass Road, Winchester, KY 40391.
