SUPPLEMENTARY INFORMATION: These meetings will be conducted jointly by the Nuclear Regulatory Commission (NRC) and the Federal Emergency Management Agency (FEMA), and will address four separate documents that have been proposed by these two agencies to address emergency planning and preparedness for nuclear power plants. These documents address both onsite (the plants themselves) and offsite (State, local, and emergency responder) planning and preparedness. The NRC will be soliciting comments on its notice of proposed rulemaking entitled "Enhancements to Emergency Preparedness Regulations" (published at 74 FR 23254 on May 18, 2009) and "Interim Staff Guidance: Emergency Planning for Nuclear Power Plants" (a notice of availability was published at 74 FR 23221 on May 18, 2009). Both of these documents are available at <http://www.regulations.gov/search/index.jsp> (Docket ID NRC-2008-0122).

FEMA will be taking comments on the joint NRC/FEMA policy document entitled "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants; NUREG-0654/FEMA-REP-1/Rev. 1 Supplement 4 (Supplement 4), and the "FEMA Radiological Emergency Preparedness Program Manual" (REPP Manual). On May 18, 2009, at 74 FR 23198, FEMA published a **Federal Register** Notice informing the public that FEMA is accepting comments on these documents. The documents are available online at <http://www.regulations.gov/search/index.jsp> (Docket ID FEMA-2008-0022).

NUREG-0654 is a joint NRC/FEMA policy document that contains the Evaluation Criteria that FEMA and the NRC use to determine compliance with the 16 Planning Standards that are located in FEMA's regulations at 44 CFR 350.5, and the NRC's regulations at 10 CFR part 50. The agencies use these Planning Standards, and associated Evaluation Criteria, to measure the adequacy of emergency preparedness plans of nuclear power plant owners and operators and the State, local, and Tribal jurisdictions in which they are sited.

Supplement 4 revises and provides additional offsite planning guidance for emergency preparedness programs at

the Nation's nuclear power plants, including the establishment of backup means for alert and notification, and increased coordination between licensees and offsite responders. The REPP Manual provides additional guidance directed to State, local, and Tribal jurisdictions. The REPP Manual consolidates all of the FEMA Radiological Emergency Preparedness (REP) Program's many operative guidance and policy documents into one location, and provides additional guidance on the proposed changes in Supplement 4. The substance of FEMA's proposed policies aligns with changes proposed in both the NRC Notice of Proposed Rulemaking and Interim Staff Guidance.

The purpose of these public meetings is to (1) jointly introduce the proposed regulations and draft guidance related to enhancing emergency preparedness (EP) regulations, and introduce NRC and FEMA draft guidance documents jointly and to explain the alignment of these documents; (2) answer questions about the proposed rule and draft guidance documents and to describe the next steps in the rulemaking and guidance document processes; (3) ensure openness during the EP rulemaking and guidance document processes; (4) provide additional opportunities for public participation in the EP rulemaking and guidance document processes; and, (5) build positive relations, confidence, and trust in the rulemaking and guidance document processes.
