1. Internet Social Security Disability Report—0960-NEW

The Social Security Act requires applicants to furnish medical and other evidence and information to prove they are disabled. Applicants for disability benefits will be given the option to provide information needed to help determine they are disabled through the Internet. The Internet Social Security Disability Report, which is similar to the Form SSA-3368-BK, Disability Report-Adult, will collect allegations of disability and gather information about the disabling condition and sources of medical evidence. Collecting this information is critical to case development and adjudication. The information on the Disability Report, together with other evidence and information, will be used by State Disability Determination Services (who make disability decisions on behalf of SSA) to develop medical evidence, assess the alleged disability, and make a determination on whether or not the applicant is disabled under the Act. SSA plans to conduct a limited pilot of the Internet Social Security Disability Report followed by national implementation. The respondents are applicants for title II and title XVI disability benefits.
