SUPPLEMENTARY INFORMATION:

Title: National Processed Raspberry Promotion, Research, and Information Program.

OMB Number: 0581–0258.

Expiration Date of Approval: November 30, 2012.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: The Processed Raspberry Promotion, Research, and Information program was created to help maintain, develop, and expand markets and uses for processed raspberries. The Processed Raspberry Promotion, Research, and Information Order (Order) (7 CFR part 1208) was established under the Commodity Promotion, Research, and Information Act of 1996 (1996 Act) (7 U.S.C. 7411–7425).

The Order provides for the development and financing of a coordinated program of research, promotion, and information for processed raspberries. The programs may include projects relating to research, consumer information, advertising, sales promotion, producer information, market development, and product development to assist, improve or promote the marketing, distribution, and utilization of processed raspberries.

The Processed Raspberry Promotion, Research and Information program was approved in a referendum conducted by USDA between June 8 and June 24, 2011, by persons to be covered by and assessed under the Order. In the referendum, 88 percent of those who voted favored implementation of the Order. Producers and importers of 20,000 or more pounds of raspberries for processing or processed raspberries respectively, during the calendar year January 1 through December 31, 2010, were eligible to vote in the referendum.

The program is administered by an industry council appointed by the Secretary of Agriculture and financed by a mandatory assessment on producers of raspberries for processing and importers

of processed raspberries. The Secretary of Agriculture also approves the council's budgets, plans, and projects. These responsibilities have been delegated to AMS.

The information collection requirements in this request are essential to carry out the intent of the 1996 Act. The objective in carrying out this responsibility includes assuring the following: (1) Funds are collected and properly accounted for; (2) expenditures of all funds are for the purposes authorized by the 1996 Act and Order; and, (3) the council's administration of the programs conforms to USDA policy.

The Order's provisions have been carefully reviewed, and every effort has been made to minimize any unnecessary recordkeeping costs or requirements, including efforts to utilize information already submitted under other raspberry programs administered by the Department and other state programs.

The forms covered under this collection require the minimum information necessary to effectively carry out the requirements of the program, and their use is necessary to fulfill the intent of the 1996 Act. Such information can be supplied without data processing equipment or outside technical expertise. In addition, there are no additional training requirements for individuals filling out reports and remitting assessments to the Council. The forms are simple, easy to understand, and place as small a burden as possible on the person required to file the information.

Collecting information yearly will coincide with normal industry business practices. The timing and frequency of collecting information are intended to meet the needs of the industry while minimizing the amount of work necessary to fill out the required reports. The requirement to keep records for two years is consistent with normal industry practices. In addition, the information to be included on these forms is not available from other sources because such information relates specifically to individual producers, first handlers, processors, foreign producers, and importers who are subject to the provisions of the 1996 Act. Therefore, there is no practical method for collecting the required information without the use of these forms.

AMS is committed to complying with the E-Government Act, which requires Government agencies in general to provide the public the option of submitting information or transacting business electronically to the maximum extent possible.

Estimate of Burden: Public reporting burden for this collection of information

is estimated to average 0.36 hours per response.

Respondents: Producers, first handlers, importers, foreign producers, and at-large nominees.

Estimated Number of Respondents: 297.

Estimated Total Annual Responses: 788.

Estimated Number of Responses per Respondent: 2.65.

Estimated Total Annual Burden on Respondents: 282.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this document will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Dated: June 15, 2012.

Ruihong Guo,

Acting Administrator.

SUPPLEMENTARY INFORMATION:

Background

The World Trade Organization (WTO) was established on January 1, 1995, as the common international institutional framework for the conduct of trade relations among its members in matters related to the Uruguay Round Trade Agreements. The WTO is the successor organization to the General Agreement on Tariffs and Trade (GATT). U.S. membership in the WTO was approved and the Uruguay Round Agreements Act was signed into law by the President on December 8, 1994. The Uruguay Round Agreements became effective, with respect to the United States, on January 1, 1995. Pursuant to section 491 of the Trade Agreements Act of 1979, as amended, the President is required to designate an agency to be "responsible for informing the public of the sanitary and phytosanitary (SPS) standard-setting activities of each international standard-setting organization." The main organizations are Codex, the World Organisation for Animal Health, and the International Plant Protection Convention. The President, pursuant to Proclamation No. 6780 of March 23, 1995 (60 FR 15845), designated the U.S. Department of Agriculture as the agency responsible for informing the public of the SPS standard-setting activities of each international standard-setting organization. The Secretary of Agriculture has delegated to the Office of Food Safety the responsibility to inform the public of the SPS standard-setting activities of Codex. The Office of Food Safety has, in turn, assigned the responsibility for informing the public of the SPS standard-setting activities of Codex to the U.S. Codex Office.

Codex was created in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Codex is the principal international organization for establishing standards for food. Through adoption of food standards, codes of practice, and other guidelines developed by its committees and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers, ensure fair practices in the food trade, and promote coordination of food standards work undertaken by international governmental and nongovernmental organizations. In the

United States, U.S. Codex activities are managed and carried out by the United States Department of Agriculture (USDA); the Food and Drug Administration (FDA), Department of Health and Human Services (HHS); the National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC); and the Environmental Protection Agency (EPA).

As the agency responsible for informing the public of the SPS standard-setting activities of Codex, the Office of Food Safety publishes this notice in the **Federal Register** annually. Attachment 1 (Sanitary and Phytosanitary Activities of Codex) sets forth the following information:

1. The SPS standards under consideration or planned for consideration; and
2. For each SPS standard specified:
 - a. A description of the consideration or planned consideration of the standard;
 - b. Whether the United States is participating or plans to participate in the consideration of the standard;
 - c. The agenda for United States participation, if any; and
 - d. The agency responsible for representing the United States with respect to the standard.

To obtain copies of the standards listed in attachment 1, please contact the Codex delegate or the U.S. Codex Office.

This notice also solicits public comment on standards that are currently under consideration or planned for consideration and recommendations for new standards. The delegate, in conjunction with the responsible agency, will take the comments received into account in participating in the consideration of the standards and in proposing matters to be considered by Codex.

The United States delegate will facilitate public participation in the United States Government's activities relating to Codex Alimentarius. The United States delegate will maintain a list of individuals, groups, and organizations that have expressed an interest in the activities of the Codex committees and will disseminate information regarding United States delegation activities to interested parties. This information will include the status of each agenda item; the United States Government's position or preliminary position on the agenda items; and the time and place of planning meetings and debriefing meetings following Codex committee sessions. In addition, the U.S. Codex Office makes much of the same

information available through its Web page, http://www.fsis.usda.gov/Regulations_&Policies/Codex_Alimentarius/index.asp. If you would like to access or receive information about specific committees, please visit the Web page or notify the appropriate U.S. delegate or the U.S. Codex Office, Room 4861, South Agriculture Building, 1400 Independence Avenue SW., Washington, DC 20250-3700 (uscodex@fsis.usda.gov).

The information provided in Attachment 1 describes the status of Codex standard-setting activities by the Codex Committees for the time periods from June 1, 2011, to May 31, 2012, and June 1, 2012, to May 31, 2013. Attachment 2 provides a list of U.S. Codex Officials (including U.S. delegates and alternate delegates). A list of forthcoming Codex sessions may be found at: <http://www.codexalimentarius.org/meetings-reports/en/>.

Additional Public Notification

Codex Committee on Residues of Veterinary Drugs in Foods

The Codex Committee on Residues of Veterinary Drugs in Foods (CCRVDF) determines priorities for the consideration of residues of veterinary drugs in foods and recommends Maximum Residue Limits (MRLs) for veterinary drugs. The Committee also develops codes of practice, as may be required, and considers methods of sampling and analysis for the

determination of veterinary drug residues in food. A veterinary drug is defined as any substance applied or administered to a food producing animal, such as meat or milk producing animals, poultry, fish or bees, whether used for therapeutic, prophylactic or diagnostic purposes, or for modification of physiological functions or behavior.

A Codex Maximum Residue Limit (MRL) for Residues of Veterinary Drugs is the maximum concentration of residue resulting from the use of a veterinary drug (expressed in mg/kg or ug/kg on a fresh weight basis) that is recommended by the Codex Alimentarius Commission to be permitted or recognized as acceptable in or on a food. An MRL is based on the type and amount of residue considered to be without any toxicological hazard for human health as expressed by the Acceptable Daily Intake (ADI) or on the basis of a temporary ADI that utilizes an additional safety factor. The MRL also takes into account other relative public health risks as well as food technological aspects.

When establishing an MRL, consideration is also given to residues that occur in food of plant origin or the environment. Furthermore, the MRL may be reduced to be consistent with good veterinary practices in the use of veterinary drugs and to the extent that practical analytical methods are available.

An Acceptable Daily Intake (ADI) is an estimate by the Joint FAO/WHO Expert Committee on Food Additives (JECFA) of the amount of a veterinary drug, expressed on a body weight basis, which can be ingested daily over a lifetime without appreciable health risk.

The 20th Session of the Committee met in San Juan, Puerto Rico, on May 7-11, 2012. The reference document is REP12/RVDF. The results of the 20th session of the CCRVDF will be considered by the Commission at the 35th Session in July 2012.
