SUPPLEMENTARY INFORMATION:

I. Background

II. Current Actions

III. Request for Comments

I. Background

The Federal Energy Administration Act of 1974 (FEA Act) (Pub. L. 93-275, 15 U.S.C. 761 *et seq.*) and the DOE Organization Act (Pub. L. 95-91, 42 U.S.C. 7101 *et seq.*) require the EIA to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. To carry out this program, section 13(b) of the FEA Act (15 U.S.C. 772(b)) states that "All persons owning or operating facilities or business premises who are engaged in any phase of energy supply or major energy consumption shall make available to the (Administrator) such information and periodic reports, records, documents, and other data, relating to the purposes of this Act, * * *."

Under the authorities granted, EIA conducts mandatory surveys of companies involved in energy supply and consumption. EIA's current surveys of energy suppliers include monthly surveys of petroleum product resellers and retailers, electric power supply and marketing companies, and natural gas supply companies. Collecting information from all types of energy supply companies provides EIA with information used to accurately estimate energy prices and quantities. Users of EIA's information include analysts in Federal, State, and local governments, as well as analysts in energy trade associations, energy companies, the media, consultants, and other private organizations.
