

project ratings has been in place since 1998. Thus, the requirements for project evaluation and data collection for these proposed projects are not new. In general, the information used by FTA for CIG project evaluation and rating should arise as a part of the normal project planning process.

FTA has been collecting project evaluation information from project sponsors under the existing OMB approval for this program (OMB No. 2132-0561). However, due to the addition of the Core Capacity eligibility, the changes to the steps in the CIG process made by MAP-21, and the proposed implementation of "warrants," it became apparent that some information now required might be beyond the scope of ordinary planning activities.
