

- *Social and Economic impacts:* Jobs, housing, Federal mineral royalties, and quality of life.

- *Mitigation (including Compensatory Mitigation):* When and how it applies to individual resource protection measures.

- *Reclamation and Monitoring:* The effect of currently used practices including seed mixes, revegetation, use of reference sites including ecological site descriptions.

- *Wildlife Habitat, particularly Greater sage-grouse and pronghorn antelope:* The project's potential to further fragment wildlife habitats and diminish the value of those habitats for many species.

In response to the scoping comments received, the BLM developed three alternatives to the Proposed Action: The No Action Alternative, utilizing existing standard stipulations and examining the project area under the historical rate of development of around three wells per year; Alternative A, utilizing a phased approach moving through existing leased oil and gas units and responding to identified wildlife issues; and Alternative B, which addressed a broad range of resource concerns in response to issues identified during scoping.

Alternatives A and B each analyzed the same rate of development as the Proposed Action, as well as the use of regional gathering facilities. However, in addition to varying resource protection measures, each alternative analyzed differing densities of development between one to four well pads per 640 acres, depending on the resource considerations of the project area. Additionally, Alternative A analyzed the merits of developing the project area in three geographically defined phases, occurring sequentially, and taking into consideration existing oil and gas units.

Interim and final reclamation activities would be implemented under all alternatives to return the landscape to its previous condition in conformance with the NPL Reclamation Plan and the relevant Resource Management Plans (RMP).

All alternatives conform to the Pinedale Field Office Resource Management Plan Record of Decision (2008) and the Rock Springs Field Office Green River Resource Management Plan Record of Decision (1997), as amended by the Record of Decision and Approved Resource Management Plan Amendments for the Rocky Mountain Region, Including the Greater Sage-Grouse Sub-Region of Wyoming (2015).

The Draft EIS Notice of Availability was published on July 7, 2017 (129 FR 31628), opening a 45-day public comment period. Public meetings were

held on July 25, 2017 in Pinedale, and July 26, 2017 in Rock Springs. Over 1,000 individual comment letters were received. Comments included identified issues associated with each alternative, including feasibility and sufficiency of the analysis and impacts to specific resources as a result of each alternative. Comments were considered and incorporated as appropriate into the Final EIS; however, the analysis of the alternatives and the identified impacts did not significantly change.

The Final EIS is consistent with the BLM's obligations under the Federal Land Policy and Management Act.

Authority: 40 CFR 1506.6 and 40 CFR 1506.10.

Mary Jo Rugwell,

BLM Wyoming State Director.
