SUPPLEMENTARY INFORMATION: The DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the OMB for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The Office of Workers' Compensation Programs administers the Federal Black Lung Compensation Program. The Black Lung Benefits Act (30 U.S.C. 901*et seq.*) and its implementing regulations necessitate this information collection. The regulations at 20 CFR 725.701 set out a miner's eligibility for medical services and supplies for the length of time required by the miner's pneumoconiosis and related disability. The regulations require prior approval before ordering medical equipment where the purchase price exceeds \$300.00. 20 CFR 725.705. The regulations also provide for the ongoing supervision of the miner's medical care, including the necessity, character and sufficiency of care to be furnished; gives the Office of Workers' Compensation Programs authority to request medical reports; and indicates the right to refuse payment for failing to submit any report required. 20 CFR 725.706. To

implement the statute and these regulations, it was necessary to devise a form to collect the required information. The form is the CM-893, Certification of Medical Necessity, which is completed by the miner's physician and is used by the Division of Coal Mine Workers' Compensation to determine if the miner meets the standards to qualify for durable medical equipment and home nursing. OMB has currently approved this information collection for use through May 31, 2024.
