

Multimedia submissions (audio, video, etc.) must be accompanied by a written comment.

The written comment is considered the official comment and should include discussion of all points you wish to make. The agencies will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

**FOR FURTHER INFORMATION CONTACT:**

Alicia Denning, Office of Water, Office of Wastewater Management, Mail Code 4203M, 1200 Pennsylvania Avenue NW, Washington, DC 20460; telephone number: 202-564-0018; email address: [denning.alicia@epa.gov](mailto:denning.alicia@epa.gov).

**SUPPLEMENTARY INFORMATION:** On December 13, 2024, EPA published the proposed MSGP (89 FR 101000) entitled “National Pollutant Discharge Elimination System (NPDES) 2026 Issuance of the Multi-Sector General Permit for Stormwater Discharges Associated with Industrial Activity.” The original deadline to submit comments was January 13, 2025. On February 3, 2025, the EPA extended the comment period to April 4, 2025 ((90 FR 8798)). On April 2, 2025, prior to the close of the comment period, the EPA posted a memo in the docket that extended the comment period on [www.regulations.gov](http://www.regulations.gov) for an additional 45 days (see EPA-HQ-OW-2024-0481-0212). This action published in the **Federal Register** reflects the extension of the comment period outlined in the published comment period extension memo. Written comments must now be received by May 19, 2025.

**Andrew D. Sawyers,**  
*Director, Office of Wastewater Management.*

**Memorandum**

**Subject:** Posting EPA-HQ-OW-2024-0481 to [Regulations.gov](http://Regulations.gov) for Public Access

**From:** Alicia Denning, Water Permits Division

**Thru:** Christopher Kloss, Director, Water Permits Division

This memorandum authorizes the posting of EPA-HQ-OW-2024-0481 to [Regulations.gov](http://Regulations.gov) for public access.

On December 13, 2024, all ten of the Environmental Protection Agency's (EPA) Regions proposed for public comment the 2026 National Pollutant Discharge Elimination System (NPDES)

general permit for stormwater discharges associated with industrial activity, also referred to as the “proposed 2026 Multi-Sector General Permit (MSGP)” or the “proposed permit.”

As initially published in the **Federal Register**, comments on the proposed permit were to be submitted to the EPA on or before February 11, 2025 (a 60-day public comment period). The EPA received multiple requests for additional time to submit comments and extended the public comment period by 60 days, which was set to close on April 4, 2024. The EPA has received further requests to extend the public comment period once again. Therefore, the EPA is extending the public comment period for an additional 45 days.

This proposed permit will be open for public comment from 12/13/2024 to 05/19/2025.

Submit your comments, identified by Docket ID No. EPA-HQ-OW-2024-0481 via the Federal eRulemaking Portal: [www.regulations.gov](http://www.regulations.gov).

Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from the docket. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit: <http://www.epa.gov/dockets/commenting-epa-dockets>.

**BILLING CODE 6560-50-P**

**FEDERAL COMMUNICATIONS COMMISSION**

[OMB 3060-1285; FR ID 290062]

**Information Collection Being Reviewed by the Federal Communications Commission**

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice and request for comments.

**SUMMARY:** As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning:

whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

**DATES:** Written PRA comments should be submitted on or before June 20, 2025. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

**ADDRESSES:** Direct all PRA comments to Nicole Ongele, FCC, via email [PRA@fcc.gov](mailto:PRA@fcc.gov) and to [nicole.ongele@fcc.gov](mailto:nicole.ongele@fcc.gov).

**FOR FURTHER INFORMATION CONTACT:** For additional information about the information collection, contact Nicole Ongele, (202) 418-2991.

**SUPPLEMENTARY INFORMATION:** The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection

of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

*OMB Control Number:* 3060–1285.

*Title:* Compliance with the Non-IP Call Authentication Solution Rules; Robocall Mitigation Database.

*Form Number:* N/A.

*Type of Review:* Revision of a currently approved information collection.

*Respondents:* Business or other for-profit entities.

*Number of Respondents and Responses:* 27,400 respondents; 27,400 responses.

*Estimated Time per Response:* 0.5–3 hours.

*Frequency of Response:*

Recordkeeping requirement; one-time, on occasion and annual reporting requirements.

*Obligation to Respond:* Mandatory and required to obtain or retain benefits. Statutory authority for these collections are contained in Sections 227b, 251(e), and 227(e) of the Communications Act of 1934.

*Total Annual Burden:* 39,450 hours.

*Total Annual Cost:* No Cost.

*Needs and Uses:* The Pallone-Thune Telephone Robocall Abuse Criminal Enforcement and Deterrence (TRACED) Act directs the Commission to require all voice service providers to implement STIR/SHAKEN caller ID authentication technology in the internet protocol (IP) portions of their networks and implement an effective caller ID authentication framework in the non-IP portions of their networks. Among other provisions, the TRACED Act also directs the Commission to create extension mechanisms for voice service providers. On September 29, 2020, the Commission adopted its *Call Authentication Trust Anchor Second Report and Order*. See *Call Authentication Trust Anchor*, WC Docket No. 17–97, Second Report and Order, 36 FCC Rcd 1859 (adopted Sept. 29, 2020). The *Second Report and Order* implemented section 4(b)(1)(B) of the TRACED Act, in part, by requiring a voice service provider maintain and be ready to provide the Commission upon request with documented proof that it is participating, either on its own or through a representative, including third party representatives, as a member of a working group, industry standards group, or consortium that is working to develop a non-internet Protocol caller identification authentication solution, or actively testing such a solution. The *Second Report and Order* also implemented the extension mechanisms in section 4(b)(5) by, in part, requiring

voice service providers to certify in the Robocall Mitigation Database that they have either implemented STIR/SHAKEN or adopted a robocall mitigation program and to describe that program in a filed plan. On May 19, 2022, the Commission adopted similar obligations for gateway providers. See *Advanced Methods to Target and Eliminate Unlawful Robocalls, Call Authentication Trust Anchor*, CG Docket No. 17–59, WC Docket No. 17–97, Fifth Report and Order et al., 37 FCC Rcd 6865 (adopted May 19, 2022). Specifically, like voice service providers, gateway providers were required to maintain and be ready to provide the Commission upon request with documented proof that it is participating, either on its own or through a representative, including third party representatives, as a member of a working group, industry standards group, or consortium that is working to develop a non-internet Protocol caller identification authentication solution, or actively testing such a solution. Gateway providers were also required to implement both STIR/SHAKEN on the IP portions of their networks as well as a robocall mitigation program. They must also certify to their implementation in the Robocall Mitigation Database and describe their robocall mitigation program in a filed plan. On March 16, 2023, the Commission adopted an Order imposing largely the same obligations that applied to gateway providers on a new class of providers: non-gateway intermediate providers. See *Call Authentication Trust Anchor*, Sixth Report and Order and Further Notice of Proposed Rulemaking, WC Docket No. 17–97, 38 FCC Rcd 2573 (adopted March 16, 2023). In that action, the Commission also required all voice service providers to adopt a robocall mitigation program and file a description of that program in the Robocall Mitigation Database, as well as requiring all classes of providers to file additional information in the Robocall Mitigation Database. On May 18, 2023, the Commission adopted an Order modifying some of these requirements. See *Advanced Methods to Target and Eliminate Unlawful Robocalls, Call Authentication Trust Anchor*, CG Docket No. 17–59, WC Docket No. 17–97, Seventh Report and Order et al., 38 FCC Rcd 5404 (adopted May 18, 2023). On November 21, 2024, the Commission strengthened these requirements by establishing rules for the use of third parties in the caller ID authentication process. To ensure compliance with these rules, the Commission required providers that choose to work with a

third party to authenticate calls to do so pursuant to a written agreement and specified that providers must maintain a copy of such agreement for two years following the end or termination of the agreement, and that providers may be required to submit a copy of said agreement to the Commission in connection with a compliance review or enforcement action by the Commission. See *Call Authentication Trust Anchor*, WC Docket No. 17–97, Eighth Report and Order, FCC 24–120 (adopted Nov. 21, 2024) (*Eighth Report and Order*). On December 30, 2024, the Commission adopted an Order in a separate proceeding that establishes procedural measures and technical solutions that will ensure and improve the overall quality of submissions to the Robocall Mitigation Database. In doing so, the Commission adopted a requirement that all entities and individuals that register in the Commission's CORES database update any information submitted to CORES within 10 business days of any change to that information. It also required that all Robocall Mitigation Database filers recertify annually to the accuracy and completeness of the information contained in their filing. See *Improving the Effectiveness of the Robocall Mitigation Database, Amendment of Part 1 of the Commission's Rules, Concerning Practice and Procedure, Amendment of CORES Registration System*, WC Docket No. 24–213, MD Docket No. 10–234, Report and Order, FCC 24–135 (adopted Dec. 30, 2024) (*RMD Report and Order*).

Federal Communications Commission.
