This plan will focus on inspiring target audiences to protect coastal and estuarine ecosystems through training and education programs; advancing understanding of coastal and estuarine ecosystems and informing coastal management through research and monitoring; contributing to the study and appreciation of coastal and estuarine ecosystems through the stewardship of protected sites; and gaining recognition of the reserve in coastal and estuarine ecosystem research, training, education, and stewardship through effective administration and communication strategies.

Since 2009, the reserve has completed its habitat map and added marsh vegetation and surface elevation monitoring; conducted a habitat vulnerability assessment to understand marsh vulnerability; led a number of research and training initiatives related to living shorelines; increased education programming at the Masonboro Island component of the reserve; begun

implementing Teachers on the Estuary (TOTE) training; expanded use of volunteers to conduct citizen science regarding sensitive species and site conditions; and implemented training focused on informing real estate professionals of coastal issues.
