ACTION: Solicitation for a Cooperative Agreement.

SUMMARY: The National Institute of Corrections (NIC) Jails Division is seeking applications for the development of a written guide on how to set measurable goals to ensure success in implementing the six elements of inmate behavior management (IBM), as defined by NIC. This document will be written in the context of inmate behavior management, which is described under

To be considered, applicants must demonstrate, at a minimum: (1) In-depth knowledge of the purpose, functions, and operational complexities of local jails, (2) awareness of the diversity among local jails in terms of size, resources, and levels of sophistication, (3) in-depth knowledge of the six elements of inmate behavior management, as defined by NIC, (4) expertise in defining and measuring goals within the context of inmate behavior management, and (5) ability to develop and write documents for publication.

DATES: Applications must be received by 4:00 p.m. EDT on Friday, July 1, 2011.

SUPPLEMENTARY INFORMATION: NIC has identified six key elements in effectively managing inmate behavior in jails: (1) Assessing the risks and needs of each inmate at various points during his/her detention, (2) assigning inmates to appropriate housing, (3) meeting inmates' basic needs, (4) defining and conveying expectations for inmate behavior, (5) supervising inmates, and (6) keeping inmates productively occupied. If a jail fully and properly implements all six elements, it should experience a significant reduction in the negative inmate behavior often experienced in jails, such as vandalism, violence, rule violations, and disrespectful behavior toward staff and other inmates. Applicants can obtain additional information on inmate behavior management by reviewing NIC's "Inmate Behavior Management: The Key to a Safe and Secure Jail". This document is available at <http://nicic.gov/Library/023882>.

The NIC Jails Division offers training and technical assistance on inmate behavior management. It has also begun to develop a series of guides on implementing each of the six elements. This document will be part of the series.

Scope of Work

Document Length: The number of pages will be determined by content. The document will include appendices and a bibliography.

Document Audience: Jail administrators are the primary audience, but the document may also be used by other management staff. This guide is intended for use by jails of all sizes. In developing the document, the awardee must consider the diversity of jails in terms of size, resources available, and level of sophistication.

Document Distribution: NIC expects to distribute the document widely. It will be available on the NIC website and upon request and free of charge through the NIC Information Center.

Document Content: The document will be a clear and practical guide for jail administrators. It will begin with a brief overview of the six elements of inmate behavior management, drawn from NIC's "Inmate Behavior Management: The Key to a Safe and Secure Jail." This will be followed by a discussion of the process of implementing the six elements, with emphasis on the importance of setting measurable goals as the foundation for an implementation plan. Once this context is set, the document will address the following topics, at a minimum, as they relate specifically to implementing inmate behavior management: (1) How to identify goals, (2) how to ensure that goals are relevant and measurable, (3) how to assess the quality of goals and the achievement of outcomes, with sample assessment tools, (4) how to monitor progress in achieving goals and the importance of modifying goals based on monitoring results, (5) strategies for developing staff skills in setting measurable goals, with sample exercises, and (6) policies, procedures, and required documentation related to setting, monitoring, and modifying goals, with samples of each.

NIC Review: The awardee will send the following for NIC review and approval: initial framework for the document, first draft of the document, subsequent drafts based on NIC's suggested revisions, and the final draft.

Final Product: The awardee will produce a completed document that has received initial editing from a professional editor. The awardee must follow the Guidelines for Preparing and Submitting Manuscripts for Publication as found in the "General Guidelines for Cooperative Agreements," which will be included in the award package.
