BILLING CODE 8026-03-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket #FAA-2022-0204]

Notice of Funding Opportunity

AGENCY: Federal Aviation
Administration (FAA).

ACTION: Notice of funding opportunity.

SUMMARY: The Department of
Transportation (DOT), Federal Aviation
Administration (FAA) announces the
opportunity to apply for approximately
\$1 billion in FY 2022 discretionary
funds for the newly established Airport
Terminal Program (ATP), made
available under the Infrastructure
Investment and Jobs Act of 2021 (IIJA),
Public Law 117-58, herein referred to as
the Bipartisan Infrastructure Law (BIL).
The purpose of the ATP is to make
annual grants available to eligible
airports for airport terminal
development projects that address the
aging infrastructure of the nation's
airports. In addition, ATP grants will
align with DOT's Strategic Framework
FY2022-2026 at
[www.transportation.gov/
administrations/office-policy/fy2022-
2026-strategic-framework](http://www.transportation.gov/administrations/office-policy/fy2022-2026-strategic-framework). The FY 2022
ATP will be implemented, as
appropriate and consistent with law, in
alignment with the priorities in
Executive Order 14052, Implementation
of the Infrastructure Investments and
Jobs Act (86 FR 64355), which are to

invest efficiently and equitably, promote
the competitiveness of the U.S.
economy, improve job opportunities by
focusing on high labor standards,
strengthen infrastructure resilience to
all hazards including climate change,
and to effectively coordinate with State,
local, Tribal, and territorial government
partners.

DATES: Airport sponsors that wish to be
considered for FY 2022 ATP
discretionary funding should submit an
application that meets the requirements
of this NOFO as soon as possible, but no
later than 5:00 p.m. Eastern time, March
28, 2022. Submit applications
electronically at [www.faa.gov/bil/
airport-terminals](http://www.faa.gov/bil/airport-terminals) per instructions in this
NOFO.

FOR FURTHER INFORMATION CONTACT: BIL
Implementation Team, FAA Office of
Airports, at our FAA BIL email address:
9-ARPA-BILAirports@faa.gov or Robin K.
Hunt at 202-267-3263.

A. Program Description

BIL established the ATP, a
competitive discretionary grant
program, which provides approximately
\$1 billion in grant funding annually for
five years (Fiscal Years 2022-2026) to
upgrade, modernize, and rebuild our
nation's airport terminals and sponsor-
owned Airport Traffic Control Towers
(ATCTs). This includes bringing airport
facilities into conformity with current
standards; constructing, modifying, or
expanding facilities as necessary to meet
demonstrated aeronautical demand;
enhancing environmental sustainability;
encouraging actual and potential
competition; and providing a balanced
system of airports to meet the roles and
functions necessary to support civil
aeronautical demand. This program also
supports the President's goals to
mobilize American ingenuity to build
modern infrastructure and an equitable,
clean energy future. In support of
Executive Order 13985, *Advancing
Racial Equity and Support for
Underserved Communities Through the
Federal Government* (86 FR 7009), the
FAA encourages applicants to consider
how the project will address the
challenges faced by individuals in
underserved communities and rural
areas.

The ATP falls under the project grant
authority for the Airport Improvement
Program (AIP) in 49 United States Code
(U.S.C.) § 47104. Per 2 Code of Federal
Regulations (CFR) Part 200—*Uniform
Administrative Requirements, Cost
Principles, and Audit Requirements for
Federal Awards* the AIP Federal
Assistance Listings Number is 20.106,
with the objective to assist eligible

airports in the development and
improvement of a nationwide system
that adequately meets the needs of civil
aeronautics. The FY 2022 ATP will be
implemented, as appropriate and
consistent with BIL, in alignment with
the priorities in Executive Order 14052,
*Implementation of the Infrastructure
Investments and Jobs Act* (86 FR 64355),
which are to invest efficiently and
equitably, promote the competitiveness
of the U.S. economy, improve
opportunities for good-paying jobs with
the free and fair choice to join a union
by focusing on high labor standards,
strengthen infrastructure resilience to
all hazards including climate change,
and to effectively coordinate with State,
local, Tribal, and territorial government
partners.

Consistent with statutory criteria and
Executive Order 14008, *Tackling the
Climate Crisis at Home and Abroad* (86
FR 7619), the FAA also seeks to fund
projects under the ATP that reduce
greenhouse gas emissions and are
designed with specific elements to
address climate change impacts.
Specifically, the FAA is looking to
award projects that align with the
President's greenhouse gas reduction
goals, promote energy efficiency,
support fiscally responsible land use
and transportation efficient design,
support terminal development
compatible with the use of sustainable
aviation fuels and technologies, increase
climate resilience, incorporate
sustainable pavement and construction
materials as allowable, and reduce
pollution.

B. Federal Award Information

The ATP is a \$5 billion grant program,
distributed as approximately \$1 billion
annually for five years (Fiscal Years
2022, 2023, 2024, 2025, and 2026),
subject to annual allocations limitations
based on airport roles found in the
published National Plan of Integrated
Airport Systems (NPIAS), as updated
with current year data. In general, the \$5
billion in ATP grant funding is subject
to the following annual award allocation
limitations: Not more than 55% shall be
for large hub airports, not more than
15% shall be for medium hub airports,
not more than 20% shall be for small
hub airports, and not less than 10%
shall be for nonhub and nonprimary
airports.

The FAA will consider projects that
increase capacity and passenger access;
projects that replace aging
infrastructure; projects that achieve
compliance with the Americans with
Disabilities Act (42 U.S.C. 12101, *et
seq.*) and expand accessibility for
persons with disabilities; projects that

improve airport access for historically disadvantaged populations; projects that improve energy efficiency, including upgrading environmental systems, upgrading plant facilities, and achieving Leadership in Energy and Environmental Design (LEED) accreditation standards; projects that improve airfield safety through terminal relocation; and projects that encourage actual and potential competition. This includes applicable Executive Orders as listed in Section E.2. Additionally, the FAA will provide preference to projects that complete a development objective, and priority to projects that have received partial awards.

Projects for relocating, reconstructing, repairing, or improving an airport-owned ATCT will also be considered. In addition to the considerations above, these projects will also be evaluated based on overall impact on the national airspace system including age of facility, operational constraints, and nonstandard facilities. The FAA will publish a NOFO annually to announce additional funding made available, approximately \$1 billion per year, for Fiscal Years 2023–2026.

C. Eligibility Information

1. Eligible Applicants

Eligible applicants are those airport sponsors normally eligible for Airport Improvement Program (AIP) discretionary grants as defined in 49 U.S.C. 47115. This includes a public agency, private entity, state agency, Indian Tribe or Pueblo owning a public-use NPIAS airport, the Secretary of the Interior for Midway Island Airport, the Republic of the Marshall Islands, Federated States of Micronesia, Republic of Palau.

2. Cost Sharing or Matching

The Federal cost share of ATP grants is 80 percent for large and medium hub airports, and 95 percent for the remainder of airports eligible to receive ATP grants, which includes small hub, nonhub, and nonprimary airports.

3. Project Eligibility

All projects funded from the ATP must be:

i. Airport terminal development, defined in 49 U.S.C. 47102(28) as development of an airport passenger terminal building, including terminal gates; access roads servicing exclusively airport traffic that leads directly to or from an airport passenger terminal building; and walkways that lead directly to or from an airport passenger terminal building. Under the ATP, the FAA may consider projects that qualify

as “terminal development” (including multimodal terminal development), as that term is defined in 49 U.S.C. 47102(28);

ii. On-airport rail access projects as set forth in Passenger Facility Charge (PFC) Update 75–21 (86 FR 48793, August 31, 2021);

iii. Airport-owned ATCT that includes relocating, reconstructing, repairing, or improving the ATCT; and

iv. Justified based on civil aeronautical demand.

D. Application and Submission Information

1. Address To Request Application Package

An application for ATP terminal or ATCT projects, FAA Form 5100–144, *Bipartisan Infrastructure Law, Airport Terminal and Tower Project Information*, can be found at: www.faa.gov/bil/airport-terminals.

Direct all inquiries regarding applications to the appropriate Regional Office (RO) or Airports District Office (ADO). RO/ADO contact information is below: https://www.faa.gov/about/office_org/headquarters_offices/arp/offices/regional_offices. Or to the BIL Team at: 9-ARP-BILAirports@faa.gov.

2. Content and Form of Application Submission

Applicants will be required to submit information contained in FAA Form 5100–144, *Bipartisan Infrastructure Law, Airport Terminal and Tower Project Information*. This form is provided to assist airports in completing the submission requirements established in this NOFO. Application instructions and the form can be found at: www.faa.gov/bil/airport-terminals.

All applications must be submitted electronically following the instruction on the form. Once the form is complete, save a copy of the form electronically to your files for future reference. Next, scroll to the bottom of the form and press the “submit” button. The form will be automatically emailed to the FAA BIL Team for review and evaluation, or as a backup, email the form manually to: 9-ARP-BILAirports@faa.gov.

Applicants selected to receive an ATP grant will then be required to follow AIP grant application procedures prior to award, which include meeting all prerequisites for funding, and submission of Standard Form SF–424, *Application for Federal Assistance*, and FAA Form 5100–100, *Application for Development Projects*.

Airports covered under the FAA’s State Block Grant Program should

coordinate with their associated state agencies, and submit project application via the procedures noted above.

3. Unique Entity Identifier and System for Award Management (SAM)

Applicants must comply with 2 CFR part 25—*Universal Identifier and System for Award Management*. All applicants must have a unique entity identifier provided by SAM. Additional information about obtaining a Unique Entity Identifier (UEI) and registration procedures may be found at the SAM website (currently at <http://www.sam.gov>). Each applicant is required to: (1) Be registered in SAM; (2) provide a valid UEI prior to grant award; and (3) continue to maintain an active SAM registration with current information at all times during which the applicant has an active Federal award or an application or plan under consideration by the FAA. Under the ATP, the UEI and SAM account must belong to the entity that has the legal authority to apply for, receive, and execute ATP grants.

Once awarded, the FAA grant recipient must maintain the currency of its information in SAM until the grantee submits the final financial report required under the grant or receives the final payment, whichever is later. A grant recipient must review and update the information at least annually after the initial registration and more frequently if required by changes in information or another award term.

The FAA may not make an award until the applicant has complied with all applicable UEI and SAM requirements. If an applicant has not fully complied with the requirements by the time the FAA is ready to make an award, the FAA may determine that the applicant is not qualified to receive an award and use that determination as a basis for making a federal award to another applicant.

Non-federal entities that have received a federal award are required to report certain civil, criminal, or administrative proceedings to SAM (currently the Federal Awardee Performance and Integrity Information System (FAPIIS) www.fapiis.gov) to ensure registration information is current and complies with federal requirements. Applicants should refer to 2 CFR 200.113 for more information about this requirement.

4. Submission Dates and Times

Airports that wish to be considered for FY 2022 ATP discretionary funding should submit an application that meets the requirements of this NOFO as soon as possible, but no later than 5:00 p.m.

Eastern time on March 28, 2022. Submit applications electronically at www.faa.gov/bil/airport-terminals per instructions in this NOFO.

5. Funding Restrictions

All projects funded from the ATP must be airport terminal development, defined in 49 U.S.C. 47102(28) as development of an airport passenger terminal building, including terminal gates; access roads servicing exclusively airport traffic that leads directly to or from an airport passenger terminal building; and walkways that lead directly to or from an airport passenger terminal building. Under the ATP, the FAA may consider projects that qualify as "terminal development" (including multimodal terminal development), as that term is defined in 49 U.S.C. 47102(28); and projects for on-airport rail access projects as set forth in Passenger Facility Charge (PFC) Update 75–21 (86 FR 48793, August 31, 2021).

Additionally, ATP eligible projects include relocating, reconstructing, repairing, or improving an airport-owned ATCT. ATP funds may not be used to support or oppose union organizing.

E. Application Review Information

1. Criteria

Applications for FY 2022 ATP will be rated using the following criteria:

i. Must meet eligibility requirements under the ATP, which includes terminal development (including multimodal terminal development) as defined in 49 U.S.C. 47102(28), on-airport rail access projects, or airport-owned ATCT relocation, reconstruction, repair, or improvements.

ii. Timeliness of implementation, with priority given to those projects that can satisfy all statutory and administrative requirements for grant award in FY 2022.

iii. Favorable consideration will be given to eligible and justified terminal development (including multimodal terminal development), on-airport rail access projects, and ATCT projects that:

a. *Increase capacity and passenger access:* The applicant should describe the extent to which the project contributes to the functioning and growth of the economy, including the extent to which the project addresses congestion or service gaps in rural areas. The applicant should demonstrate how the proposed project increases capacity, provides ongoing market access to the airport by competing carriers as economic and competitive conditions change, as well as how it contributes to the functioning and growth of the

economy, including the extent to which the project addresses congestion or service gaps in rural areas. The applicant should demonstrate how the proposed project increases capacity and market access or relieves congestion based on current and/or forecast needs.

b. *Replace aging infrastructure:* Applicants should describe how the project addresses replacing or upgrading facilities that have reached the end of their useful life. This includes information on the current age and condition of the asset that will be affected by the project and how the proposed project will improve asset condition. The applicant should describe how the facility no longer meets the current or forecasted operational needs of the airport. This includes the renovation, expansion, or replacement of a facility that is too small or cannot efficiently meet current or future demand. This also includes projects aimed at terminal modernization or upgrades to meet the changing user or community expectations. This can be met by including multimodal terminal development, climate resiliency, sustainability initiatives and practices incorporated therein, all with the goal of providing a terminal that focuses on the most efficient movement of passengers and baggage possible. This also includes projects that address changing environmental conditions and improve resilience to climate change, and that will be constructed consistent with the Federal Flood Risk Management Standard, to the extent consistent with current law.

c. *Achieve compliance with the Americans with Disabilities Act (ADA), including expand accessibility for persons with disabilities:* Applicants should describe how the project increases mobility, expands access, and improves connectivity for people with disabilities both inside and outside the terminal or ATCT. The information should demonstrate how the proposed project will meet the requirements under the Americans with Disabilities Act and improve equitable access for people with disabilities.

d. *Improve airport access for historically disadvantaged populations:* Applicants should describe how the project increases mobility, expands access, and improves connectivity for historically disadvantaged populations. The information should demonstrate how the proposed project provides a significant local and regional impact and benefits historically disadvantaged populations. The applicant should include a description of public engagement on a local and regional level

that has occurred, demonstrates proactive inclusivity of historically disadvantaged communities, and the degree to which public comments and commitments have been integrated into the project. DOT is providing a list of communities that meet the definition of Historically Disadvantaged Communities, available at <https://adip.faa.gov/agis/public/#/disadvantagedCommunities>.

e. *Improve energy efficiency including upgrading environmental systems, upgrading plant facilities, and achieving Leadership in Energy and Environmental Design (LEED) accreditation standards:* Applicants should provide information demonstrating how the proposed project will reduce air pollution and greenhouse gas emissions from a reduction in energy consumption through energy efficient design. This includes how the project may facilitate the airport in achieving LEED accreditation standards through reliance on alternative energy, water use reduction, sustainable site selection and development, responsible materials selection and waste management, incorporating lower-carbon pavement and construction materials, enhanced indoor environmental quality, use of terminal facility for renewable energy production, or other sustainability efforts (e.g., vehicle charging stations attached to the terminal) that further reduce long-term impact on climate. A proposed project, including utility support facilities, should be part of an overall plan that sets targets to lower carbon emissions, working toward a carbon-neutral airport by 2050.

f. *Improve airfield safety through terminal relocation:* Applicants should describe how the proposed terminal project is improving airfield safety through the relocation of the terminal building or its components. This could also include a project to relocate a terminal that assists in addressing nonstandard airfield configurations.

g. *Encourage actual and potential competition:* The applicant should describe the extent to which the project promotes competition in air service by providing greater ability to accommodate new entrants; increasing the ability of competing air carriers to access constrained facilities on an ongoing basis; and facilitating the efficient, and reliable movement of passengers and cargo. The applicant may also wish to describe how the project will offer regional and national impacts by improving the economic strength of regions and cities; increase opportunities for tourism; result in long-term job creation by supporting good-

paying jobs with the free and fair choice to join a union directly related to the project; and help the United States compete in a global economy by encouraging the location of important industries and future innovations and technology in the U.S.

iv. ATCT projects that relocate, reconstruct, repair, or improve an airport-owned ATCT will also be evaluated based on overall impact on the national airspace system including age of facility, operational constraints, and nonstandard facilities.

v. FAA will provide a preference to projects that achieve a complete development objective, even if awards for the project must be phased, and prioritize projects that have received partial awards.

vi. The applicant should describe whether and how project delivery and implementation create good-paying jobs with the free and fair choice to join a union to the greatest extent possible, the use of demonstrated strong labor standards, practices and policies (including for direct employees, contractors, and sub-contractors); use of project labor agreements; distribution of workplace rights notices; the use of Local Hire Provisions;¹ registered apprenticeships; or other similar standards or practices. The applicant should describe how planned methods of project delivery and implementation (for example, use of Project Labor Agreements and/or Local Hire Provisions,² training and placement for underrepresented workers) provide opportunities for all workers, including workers underrepresented in construction jobs to be trained and placed in good-paying jobs directly related to the project. FAA will consider this information in evaluating the application.

2. Review and Selection Process

Applications will be evaluated based on the information submitted related to the above criteria in E.1 to ensure responsiveness to this NOFO and the intent of the ATP. Applicants are encouraged to submit projects that meet as many of the above criteria as possible, but do not need to meet all criteria to be considered. Federal awarding agency personnel will evaluate applications based on how well the projects meet the criteria in E.1,

including project eligibility, justification, readiness, and the availability of matching funds. The FAA will also consider projects that advance the goals of the following Executive Orders: The President's January 20, 2021, Executive Order 13990, "*Protecting Public Health and the Environment and Restoring Science to Tackle the Climate Crisis*"; the President's January 20, 2021, Executive Order 13985, "*Advancing Racial Equity and Support for Underserved Communities Through the Federal Government*"; the President's January 27, 2021, Executive Order 14008, "*Tackling the Climate Crisis at Home and Abroad*"; and the President's July 9, 2021, Executive Order 14036, "*Promoting Competition in the American Economy*."

3. Integrity and Performance Check

Prior to making a Federal award with a total amount of Federal share greater than the simplified acquisition threshold, FAA is required to review and consider any information about the applicant that is in the designated integrity and performance system accessible through SAM (currently FAPIIS) (see 41 U.S.C. 2313). An applicant, at its option, may review information in the designated integrity and performance systems accessible through SAM and comment on any information about itself that a Federal awarding agency previously entered. FAA will consider any comments by the applicant, in addition to the other information in the designated integrity and performance system, in making a judgment about the applicant's integrity, business ethics, and record of performance under Federal awards when completing the review of risk posed by applicants as described in § 200.206.

F. Federal Award Administration Information

1. Federal Award Notices

BIL awards are announced through a Congressional notification process and a DOT Secretary's Notice of Intent to Fund. The FAA RO/ADO representative will contact the airport with further information and instructions. Once all pre-grant actions are complete, the FAA RO/ADO will offer the airport sponsor a grant for the announced project. This offer may be provided through postal mail or by electronic means. Once this offer is signed by the airport sponsor, it becomes a grant agreement. Awards made under this program are subject to conditions and assurances in the grant agreement.

2. Administrative and National Policy Requirements

i. Pre-Award Authority

Costs incurred after enactment of the BIL, November 15, 2021, are eligible for reimbursement under the ATP.

ii. Grant Requirements

All grant recipients are subject to the grant requirements of the AIP, found in 49 U.S.C. Chapter 471. Grant recipients are subject to requirements in the FAA's *AIP Grant Agreement* for financial assistance awards; the annual Certifications and Assurances required of applicants; and any additional applicable statutory or regulatory requirements, including nondiscrimination requirements and 2 CFR part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*. Grant requirements include, but are not limited to, approved projects on an airport layout plan; and compliance with federal civil rights laws, Buy American requirements under 49 U.S.C. 50101, the *Department of Transportation's Disadvantaged Business Enterprise (DBE) Program* regulations for airports (49 CFR part 23 and 49 CFR part 26), Build America, Buy America requirements in sections 70912(6) and 70914 in Public Law No: 117-58, the Infrastructure Investment and Jobs Act, and prevailing wage rate requirements under the Davis-Bacon Act, as amended (40 U.S.C. 276a-276a-5, and reenacted at 40 U.S.C. 3141-3144, 3146, and 3147).

iii. Standard Assurances

Each grant recipient must assure that it will comply with all applicable federal statutes, regulations, executive orders, directives, FAA circulars, and other federal administrative requirements in carrying out any project supported by the ATP grant. The grant recipient must acknowledge that it is under a continuing obligation to comply with the terms and conditions of the grant agreement issued for its project with the FAA. The grant recipient understands that federal laws, regulations, policies, and administrative practices might be modified from time to time and may affect the implementation of the project. The grant recipient must agree that the most recent Federal requirements will apply to the project unless the FAA issues a written determination otherwise.

The grant recipient must submit the Certifications at the time of grant application and Assurances must be accepted as part of the grant agreement at the time of accepting a grant offer.

¹ IJIA div. B Section 25019 provides authority to use geographical and economic hiring preferences, including local hire, for construction jobs, subject to any applicable State and local laws, policies, and procedures.

² Project labor agreement should be consistent with the definition and standards outlined in Executive Order 14063.

Grant recipients must also comply with 2 CFR part 200, which is cited in the grant assurances of the grant agreements. The Airport Sponsor Assurances are available on the FAA website at: https://www.faa.gov/airports/aip/grant_assurances.

3. Reporting

Grant recipients are subject to financial reporting per 2 CFR 200.328 and performance reporting per 2 CFR 200.329. Under the ATP, the grant recipient is required to comply with all Federal financial reporting requirements and payment requirements, including the submittal of timely and accurate reports. Financial and performance reporting requirements are available in the FAA October 2020 Financial Reporting Policy, which is available at https://www.faa.gov/airports/aip/grant_payments/media/aip-grant-payment-policy.pdf.

The grant recipient must comply with annual audit reporting requirements. The grant recipient and sub-recipients, if applicable, must comply with 2 CFR part 200 subpart F Audit Reporting Requirements. The grant recipient must comply with any requirements outlined in 2 CFR part 180, *Office of Management and Budget (OMB) Guidelines to Agencies on Government wide Debarment and Suspension*.

G. Federal Awarding Agency Contact(s)

For further information concerning this notice, please contact the FAA BIL Implementation Team via email at 9-ARP-BILAirports@faa.gov. In addition, FAA will post answers to frequently asked questions and requests for clarifications on FAA's website at www.faa.gov/bil/airport-terminals. To ensure applicants receive accurate information about eligibility of the program, the applicant is encouraged to contact FAA directly, rather than through intermediaries or third parties, with questions.

All applicants, including those requesting full federal share of eligible projects costs, should have a plan to address potential cost overruns as part of an overall funding plan.

Issued in Washington, DC, on February 22, 2022.

Robin K. Hunt,

Manager, FAA Office of Airports BIL Implementation Team.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Noise Exposure Map Update

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the Noise Exposure Maps submitted by City of Chicago Department of Aviation for Chicago Midway International Airport seq (Aviation Safety and Noise Abatement Act) are in compliance with applicable requirements.

APPLICABLE DATE: The effective date of the FAA's determination on the noise exposure maps is February 18, 2022.

FOR FURTHER INFORMATION CONTACT: Amy Hanson, Environmental Protection Specialist, Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue, Des Plaines, IL 60018, Phone: 847-294-7354.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps submitted for Chicago Midway International Airport are in compliance with applicable requirements of Part 150, effective February 18, 2022. Under 49 U.S.C. 47503 of the Aviation Safety and Noise Abatement Act (hereinafter referred to as "the Act"), an airport operator may submit to the FAA noise exposure maps which meet applicable regulations and which depict non-compatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies, and persons using the airport. An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) Part 150, promulgated pursuant to the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes to take to reduce existing non-compatible uses and prevent the introduction of additional non-compatible uses.

The FAA has completed its review of the noise exposure maps and accompanying documentation submitted by City of Chicago Department of Aviation. The

documentation that constitutes the "noise exposure maps" as defined in section 150.7 of Part 150 includes: Exhibit 3-1 and Exhibit 4-1 of the Part 150 study document. The FAA has determined that these noise exposure maps and accompanying documentation are in compliance with applicable requirements. This determination is effective on February 18, 2022.

FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program. If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 47503 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 47506 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 47503 of the Act. The FAA has relied on the certification by the airport operator, under section 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

The full noise exposure map documentation and of the FAA's evaluation of the maps is available for examination at the <https://www.flychicago.com/community/mdwnoise>.

Questions may be directed to the individual named above under the heading **FOR FURTHER INFORMATION CONTACT**.
