SUPPLEMENTARY INFORMATION: The Norfolk Southern Railway (NSR) owns and operates the swing span of the Neuse River Railroad Bridge across Neuse River in New Bern NC. The bridge has zero vertical clearance in the closed position to vessels, above mean high water. The current operating regulations are outlined at 33 CFR 117.5, which requires the bridge to open promptly and fully for the passage of vessels when a request to open is given.

NSR has requested a temporary deviation to the existing regulations for the Neuse River Railroad Bridge to facilitate mechanical repairs. The repairs consist of removing, refurbishing, and replacing of drive shaft bearings, wedge blocks, rail levers, and turnbuckles.

Under this deviation, the swing span of the drawbridge will be maintained in the closed-to-navigation position from 8 a.m. on November 16, 2010, through 8 a.m. on November 18, 2010.

According to information furnished by NSR, the swing span normally remains open to vessels, closing to permit rail traffic usually four times in a 24-hour period and these closures generally occur between 11 p.m. and 10 a.m. In 2009, between 10 a.m. and 11 p.m., vessel traffic passing at the swing span typically consisted of four yachts.

The Coast Guard will inform the users of the waterway through our Local and Broadcast Notices to Mariners of the closure period so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

There are no alternate routes for vessels transiting this section of the Neuse River and the drawbridge will be unable to open in the event of an emergency.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulation is authorized under 33 CFR 117.35.

Dated: November 2, 2010.
