Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of existing safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Drummond Company, Inc.

[Docket No. M-2004-032-C]

Drummond Company, Inc., P.O. Box 10246, Birmingham, Alabama 35202-0246 has filed a petition to modify the application of 30 CFR 75.601 (Short circuit protection of trailing cables) to its Shoal Creek Mine (MSHA I.D. The petitioner requests a modification of the existing standard to permit the use of an alternative method for identifying circuit breakers and disconnecting devices. The petitioner proposes to mount the circuit breaker and corresponding receptacle on a panel in a manner that will maintain a physical relationship between the breaker and the receptacle; and to install two permanent labels on each panel that will indicate Circuit #1 and Circuit #2, etc., just above the circuit breaker and the corresponding receptacle that operates the circuit breaker. The petitioner has listed in this petition other procedures that would be followed for implementation of the proposed alternative method. The petitioner proposes to identify labeling on the trailing cable plugs that will indicate that the machine is attached to a particular cable; post signs in strategic locations on the power center that will indicate labeling requirements; provide specific training before the proposed alternative method is implemented to all miners who are designated to verify the instantaneous short circuit settings; and submit proposed revisions for its approved Part 48 training plan to the Coal Mine Safety and Health District Manager for the area in which the mine is located that will specify task training for miners designated to verify the labeling and short circuit settings. The petitioner asserts that the proposed
