ENVIRONMENTAL PROTECTION AGENCY

[FRL-9127-1]

New York State Prohibition of Discharges of Vessel Sewage; Receipt of Petition and Tentative Affirmative Determination

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice—Receipt of petition and tentative affirmative determination.

SUMMARY: Notice is hereby given that a petition has been received from the State of New York requesting a determination by the Regional Administrator, U.S. Environmental

Protection Agency, that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the waterways of the New York State (NYS) Canal System, including the 524 linear miles of navigable waterways within the Erie, Oswego, Champlain, and Cayuga-Seneca canal segments, and including Onondaga, Oneida, and Cross Lakes. The waters of the proposed No Discharge Zone fall within the jurisdictions of the NYS Thruway Authority and NYS Canal Recreationway Commission.

The NYS Department of Environmental Conservation (NYSDEC) in collaboration with the New York State Canal Corporation, the New York Department of State, and the New York State Environmental Facilities Corporation prepared and submitted an application for the designation of a Vessel Waste No Discharge Zone. The NYSDEC certified the need for greater protection of the water quality. EPA hereby makes a tentative affirmative determination that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the New York State Canal System.

DATES: Comments regarding this tentative determination are due by April 14, 2010.

ADDRESSES: You may submit comments by any of the following methods:

- *E-mail:* chang.moses@epa.gov.
- Include "Comments on Tentative Affirmative Decision for NYS Canal NDZ" in the subject line of the message.
- *Fax:* 212-637-3891.

SUPPLEMENTARY INFORMATION: Notice is hereby given that a petition has been received from the State of New York requesting a determination by the Regional Administrator, U.S. Environmental Protection Agency, pursuant to section 312(f)(3) of Public Law 92-500 as amended by Public Law 95-217 and Public Law 100-4, that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the NYS Canal System.

Adequate pumpout facilities are defined as one pumpout station for 300–600 boats under the Clean Vessel Act: Pumpout Station and Dump Station Technical Guidelines (**Federal Register**, Vol. 59, No. 47, March 10, 1994). There are four distinct segments of the NYS Canal System.

Champlain Canal

The Champlain Canal encompasses an area from the Federal lock in Troy to Whitehall, NY. The total travel distance of this area is 60 miles and to travel the entire length takes approximately 7 hours. There are 276 slips available and 7 operating pumpouts on the Champlain Canal, which leads north to Lake Champlain, a large waterbody that is a No Discharge Zone (NDZ) for pumpout waste, as well as one which prohibits direct disposal of greywater. The 1:300 ratio would only require one pumpout, if the calculation were based solely on number of slips. The availability of seven for this canal meets the criteria for sufficient access, even accounting for transient traffic. The NYS side of Lake Champlain (a waterbody that has already been designated as a NDZ) has an additional 1,014 slips available and 10 additional pumpouts.

Erie Canal

The Erie Canal stretches from Waterford (at the confluence of the Mohawk and Hudson Rivers) to the Tonawandas (at the Niagara River), traveling through Oneida Lake and Cross Lake, and connecting to Onondaga Lake along the way. This portion of the Canal is 338 miles long and has 45 pumpouts available for 2,555 slips. Achieving a 1:300 ratio would require a minimum of nine pumpouts for the current number of slips, therefore, there are more than sufficient number of pumpouts for this canal segment as a whole.

Oswego Canal

The Oswego Canal is a 24-mile long stretch from the main Erie Canal up to the Port of Oswego and Lake Ontario. This section of the canal has 407 slips and three pumpouts, all located at the City of Oswego terminus. The travel time for the length of this segment is approximately two hours and 20 minutes. Along the way, the Minetto River View Park in Minetto and the Canal Park Marina in Fulton have restrooms available for boaters.

Cayuga-Seneca Canal

The Cayuga-Seneca Canal is a small, 12 mile-long section of the larger canal that veers from the main Erie Canal and intersects with two Finger Lakes—

Cayuga and Seneca Lakes. It contains 582 slips and seven pumpouts. In addition, although the two lakes are not included in this NYS Canal NDZ application, there are 7 pumpouts in Cayuga and 5 pumpouts in Seneca available.

In conclusion, the criterion for established by the Clean Vessel Act regarding an adequate number of pumpouts per vessel population is 1 pumpout per 300–600 vessels. All areas and sections of the NYS Canal System meet or exceed this criterion.

 EPA hereby makes a tentative affirmative determination that adequate

facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the waters of the New York State Canal System, including the 524 linear miles of navigable waterways within Erie, Oswego, Champlain, and Cayuga-Seneca canal segments, and including Onondaga, Oneida, and Cross Lakes. A 30-day period for public comment has been opened on this matter which may result in a prohibition of all sewage discharges from vessels in the above-described NYS Canal System in New York.

Dated: March 4, 2010.
