SUPPLEMENTARY INFORMATION:

I. Abstract

The purpose of this information collection is to obtain socioeconomic information in the Flower Gardens Bank National Marine Sanctuary (FGBNMS). The FGBNMS is in the process of revising its management plan, and two issues have emerged as top priorities: (1) boundary expansion and (2) research only area. Information is required to assess the potential socioeconomic impacts of boundary expansion and research only area alternatives. The study involves surveys of seven different user group/stakeholders: commercial fishing operations, recreational charter/party boat operations, private households that participate in recreational fishing, dive charter/guide operations, private households that participate in SCUBA diving, and oil and gas operations.

Information will be collected on spatial use for all user groups to assess the extent of potential displacement of activity from either a proposed boundary expansion alternative or a research only area alternative.

For business operations, costs and earnings will be obtained to assess the impact of regulatory alternatives on business profits. Socioeconomic/demographic information on owners/operators and number of employees and family members of owners/operators will also be obtained.

For members of households that participate in recreational fishing or recreational SCUBA diving, information will be collected on socioeconomic/demographic profiles, spending associated with their activity, economic user value associated with their activity, and knowledge, attitudes and perceptions about FGBNMS management strategies and regulations.

II. Method of Collection

Interviews will generally be used. For business operations, a team will go to the business establishment and work with the business owner/staff to compile the information requested. Questionnaire forms and maps will be used to guide the information collection. For members of private households engaging in recreational activities, combinations of face-to-face, mail and Internet surveys will be conducted.
