

escape vents and smaller trap mesh and entrance heads;

2. Trap limit requirements, as listed in § 697.19, for LCMA 1, 2, 3, 4 and 5, to be exceeded by 3 additional traps per fishing vessel for a total of 60 additional traps;

3. Trap tag requirements, as specified in § 697.19(j), to allow for the use of untagged traps (though each experimental trap will have the participating fisherman's identification attached); and

4. Possession restrictions in §§ 697.20(a), 697.20(d), and 697.20(g) to allow for temporary possession of juvenile, v-notched, and egg-bearing lobsters for onboard biological sampling.

If the EFP is approved, this research would take place during the regular fishing activity of the participating vessels: 6 "inshore" vessels in LCMA 2 and 14 "offshore" vessels in LCMAs 1, 3, 4, and 5. Experimental traps will be attached to a standard, Atlantic Large Whale Take Reduction Plan-compliant trap trawl. Modifications to conventional lobster traps include closed escape vents, single parlors, and smaller mesh sizes and entrance heads, to allow for the capture of juvenile lobsters and Jonah crabs. Sampling would occur weekly in LCMA 2, and every 10 days in the other areas.

All lobster and Jonah crabs caught in the experimental traps would be counted, sexed, and measured. Biological information including shell hardness and presence of eggs would also be recorded. All species captured in study traps would be returned promptly to the sea after sampling. All data collected would be made available to state and Federal management agencies to improve and enhance the available data for these two crustacean species.

We anticipate that the final rulemaking to implement Jonah crab Federal regulations will occur during the proposed study period. To ensure that there is no disruption to research activities, we would modify exemptions granted to this study, should they be approved, to include exemption from the possession of undersized and egg-bearing Jonah crabs. We have solicited comment on this expansion in the Jonah Crab Fishery Management Plan rulemaking process.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the study period. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or

impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

SUPPLEMENTARY INFORMATION: Notice is hereby given of a meeting of MAFAC's CBP Task Force. The MAFAC was established by the Secretary of Commerce (Secretary) and, since 1971, advises the Secretary on all living marine resource matters that are the responsibility of the Department of Commerce. The MAFAC charter and meeting information are located online at <https://www.fisheries.noaa.gov/topic/partners#marine-fisheries-advisory-committee>. The CBP Task Force reports to MAFAC and is being convened to develop recommendations for long-term goals to meet Columbia Basin salmon recovery, conservation needs, and

harvest opportunities, in the context of habitat capacity and other factors that affect salmon mortality. More information is available at the CBP Task Force web page: http://www.westcoast.fisheries.noaa.gov/columbia_river/index.html.

Matters To Be Considered
