SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Public Notice in EB Docket No. 04-296, DA 12-834, released on May 25, 2012. This document is available to the public at http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db0525/DA-12-834A1.doc.

Synopsis of the Public Notice

1. On April 23, 2012, the Commission received a petition filed by the ACA for partial reconsideration of that portion of the Commission's *EAS Fifth Report and Order* (77 FR 16688, March 22, 2012) "requiring operators of cable systems lacking physical * * * broadband Internet connections to seek waivers under the Commission's standard procedures." ACA proposes that the Commission establish a streamlined waiver process for cable systems that serve less than 501 subscribers, subject to a showing of compliance with specified conditions, and that waivers obtained through this process last at least one year. By the Public Notice, the Commission establishes a pleading cycle for oppositions and replies in response to the petition as indicated above. In addition, the Commission invites comment on a number of specific questions related to the petition as described below.

Background

2. The *Fifth Report and Order* will require all EAS Participants to convert EAS messages formatted in the Common Alerting Protocol (CAP) into messages that comply with EAS Protocol requirements, and to monitor the Federal Emergency Management Agency's Integrated Public Alert and Warning System (IPAWS) for federal CAP-formatted alert messages using whatever interface technology is appropriate. The Commission noted that "the primary method of distributing CAP messages will be via a broadband Internet connection." Accordingly, the Commission also decided in the *Fifth Report and Order* that "the physical unavailability of a broadband Internet service offers a presumption in favor of a waiver." The Commission noted that this presumption would primarily benefit smaller EAS Participants, for whom obtaining CAP capable EAS equipment would be a relatively larger financial commitment. However, the Commission also determined that such a waiver "likely would not exceed six months," with an option of renewal, given that broadband Internet access "may become available at some point after a waiver has been granted, and that alternate means of distributing CAP alert messages, such as satellite delivery, may also become available."

3. In its Petition, ACA argues that the Commission's foregoing presumption would "not provide meaningful relief for * * * small operators" due to the "need to devote significant administrative resources to preparing waiver requests." ACA argues that to

ameliorate this concern the Commission should implement a streamlined waiver process for systems serving fewer than 501 subscribers, requiring a “waiver request certification * * * signed by a company representative or officer responsible for its truthfulness, [which] should include the following: * * *

- A statement that the cable operator currently does not have physical access to a wireline broadband connection at the system head-end.
- A statement that obtaining physical access to a wireline broadband connection would require costs in excess of a provider’s normal installation drop fee (i.e. special construction costs or line extension fees).”

ACA argues that “[w]aivers granted pursuant to this process should be granted for at least a period of one year, with renewal years available, or until the operator: (i) Obtains broadband Internet service at the system headend; or (ii) can obtain broadband Internet service without incurring additional construction or set-up fees, such as line extension charges.”

Discussion

4. The Commission seeks comment on ACA’s Petition. It also seeks comment on several specific issues. First, it notes that the its *Fifth Report and Order* nowhere states that a *wireline* broadband connection is necessary to comply with the Commission’s requirement that EAS Participants be able to receive CAP-formatted alerts by June 30, 2012. Accordingly, it seeks comment whether any presumption in favor of granting a waiver based on lack of physical access to broadband should be limited to an EAS Participant’s lack of physical access to a wireline broadband connection, as ACA requests. Stated differently, would an EAS Participant’s physical access to, for example, a wireless or satellite broadband connection provide sufficient bandwidth for purposes of complying with the relevant requirements of the *Fifth Report and Order*?

5. The Commission also seeks comment on ACA’s suggestion that the Commission should, at least in part, consider the costs to EAS Participants of obtaining broadband Internet access service when assessing whether to grant waiver relief. If so, how should the Commission weigh such cost in this assessment? For example, ACA requests that the Commission waive CAP compliance for cable systems serving fewer than 501 subscribers if the cost of broadband access is “in excess of a

provider’s normal installation drop fee (i.e. special construction costs or line extension fees).” Is this the proper criterion for such an assessment? If not, what specific costs should the Commission consider to make such an assessment? Should such an assessment be dependent on the financial condition of the petitioner? If so, what standard should the Commission use for assessing whether a waiver is warranted based on financial condition? How much and what kind of information about a petitioner’s financial condition should be submitted in support of a waiver request? Should information as to where the waiver applicant is in its EAS equipment replacement cycle be a factor in the Commission’s analysis? Should factual statements in the waiver request be certified by a corporate officer, rather than some other representative? Does the proposed one-year period for waivers, terminable once broadband access becomes available without “additional construction or set-up fees,” adequately address the Commission’s concerns about changing circumstances? Would a six-month reporting condition, attesting to the continuing compliance with the original conditions, be a better way of addressing those concerns without adding unnecessary costs?

6. Finally, in its petition, ACA proposes that those filing a waiver certification include “[a]n affirmation that the operator understands it must continue to operate its legacy EAS equipment.” Is this criterion sufficient to ensure that subscribers remain able to receive timely and accurate EAS alerts? Should the Commission, for example, require that the waiver certification include an affirmation that the cable operator continues to operate legacy EAS equipment that is capable of receiving and transmitting the Emergency Action Notification?

Procedural Matters

A. Ex Parte Presentations

7. This matter is subject to the “permit-but-disclose” provisions of the Commission’s *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with § 1.1206(b) of the Commission’s rules. In proceedings governed by § 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (e.g., .doc, .xml, .ppt, searchable .pdf).
